## EXECUTIVE SUMMARY

Fuller, Mossbarger, Scott and May Engineers, Inc. (FMSM), under contract to the U.S. Army Corps of Engineers (USACE), Louisville District, has prepared this ECP Report for the Bonny Oaks – VAAP U.S. Army Reserve (USAR) Center (Facility ID TN107), hereafter referred to as the “Site” or “USAR Center.” The Site is located at 6703 Bonny Oaks Drive, Chattanooga, Tennessee and encompasses approximately one acre. The Site is located on the former Volunteer Army Ammunition Plant (VAAP).

This ECP Report was conducted in conformance with primary Department of Defense and Army guidance, the Department of Defense’s Base Redevelopment and Realignment Manual, DoD 4165.77-M (BRRM), Army regulations and the American Society for Testing and Materials (ASTM) Designation D 6008-96 (2005), *Standard Practice for Conducting Environmental Baseline Surveys*, as secondary guidance when it was not inconsistent with the primary guidance.

This ECP Report details the history of the property, including the U.S. Army Reserve and any prior tenant uses of the Site and the resulting environmental condition of the property.

The USAR Center facility is situated on approximately one acre of land with two permanent buildings: a 5,822 square-foot administration building (Building 228) and a 4,775 square-foot training building (Building 229). The Site is currently occupied by the 591<sup>st</sup> Transportation Detachment and the 212<sup>th</sup> Transportation Company.

Based on a review of aerial photographs and U.S. Geological Survey (USGS) topographic maps dating back to 1958, the Site has been part of a military facility since before 1958. Buildings 228 and 229 were reported to be constructed in the 1970s.

Areas of potential environmental concern were reviewed and FMSM identified a potential impact relating to the TNT contaminant migration from properties surrounding the USAR Center. A remediation plan has been implemented for the former VAAP manufacturing areas and no further remedial action is necessary.

In accordance with Department of Defense policy defining the classifications (See Deputy Under Secretary of Defense Goodman Memorandum dated 21 October 1996), the Property has been classified as Category 4. This classification does not include categorizing the property based on *de minimis* conditions that generally do not present material risk of harm to the public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

## 1.0 INTRODUCTION

FMSM was contracted by the USACE – Louisville District, to prepare an ECP Report for the Bonny Oaks – VAAP USAR Center (TN107). The facility is located at 6703 Bonny Oaks Drive, Chattanooga, Tennessee, hereafter referred to as the “Site” or “USAR Center”. In support of the ECP Report, a visual reconnaissance of the Site was conducted on 14 August 2006. The purpose of the visit was to visually obtain information indicating the environmental condition of property at the Site.

### 1.1 PURPOSE OF ENVIRONMENTAL CONDITION OF PROPERTY REPORT

The Military Department with real property accountability shall assess, determine and document the environmental condition of all transferable property in an ECP Report. This ECP Report is based on readily available information. Pursuant to the Department of Defense’s policy, set forth in the Base Redevelopment and Realignment Manual (DoD 4165.66-M, March 1, 2006) Section C8.3 (BRRM), the primary purposes of the ECP Report include the following:

- Provide the Army with information it may use to make disposal decisions;
- Provide the public with information relative to the environmental condition of the property;
- Assist in community planning for the reuse of Base Realignment and Closure (BRAC) property;
- Assist Federal agencies during the property screening process;
- Provide information for prospective buyers;
- Assist prospective new owners in meeting the requirements under EPA’s “All Appropriate Inquiry” regulations;
- Provide information about completed remedial and corrective actions at the property;
- Assist in determining appropriate responsibilities, asset valuation, and liabilities with other parties to a transaction.

The ECP Report contains the information required to comply with the provisions of 40 Code of Federal Regulations (CFR) Part 373, which require that a notice accompany contracts for the sale of, and deeds entered into, for the transfer of federal property on which any hazardous substance was stored, released or disposed of. The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA),

Section 120(h) stipulates that a notice is required if certain quantities of designated hazardous substances have been stored on the property for 1 year or more – specifically, quantities exceeding 1,000 kilograms or the reportable quantity, whichever is greater, of the substances specified in 40 CFR 302.4 or 1 kilogram of acutely hazardous waste as defined in 40 CFR 261.30. A notice is also required if hazardous substances have been disposed of or released on the property in an amount greater than or equal to the reportable quantity. Army Regulation (AR) 200-1 requires that the ECP Report address asbestos, lead-based paint, radon and other substances potentially hazardous to human health.

This ECP Report used the American Society for Testing and materials (ASTM) Designation D 6008-96 (2005), *Standard Practice for Conducting Environmental Baseline Surveys* as a guideline when not inconsistent with the BRRM, CERCLA § 120, Army regulations and other applicable Army guidance.

## **1.2 SCOPE OF SERVICES**

The ECP Report encompasses Buildings 228 and 229 of the USAR Center located at 6703 Bonny Oaks Drive, Chattanooga, Tennessee, and covers approximately one acre. The property is bordered on the north by the Area Maintenance Support Activity (AMSA) facility and to the south, east and west by property owned by the Hamilton County Board of Education. Site maps are provided in Appendix A. Appendix B provides photographs taken during the August 2006 site visit. Appendix C provides an environmental lien search and historical chain of title information. Historical environmental documents and reports are provided in Appendix D, while Appendix E contains the Environmental Data Resources, Inc. (EDR) reports and agency letters.

This ECP Report classifies the property into one of seven DoD Environmental ECP categories as defined by Deputy Under Secretary of Defense S. Goodman Memorandum, “Clarification of ‘Uncontaminated’ Environmental Condition of Property at BRAC Installations” (21 October 1996). The property classification categories are as follows:

- Category 1 – Areas where no release or disposal of hazardous substances or petroleum products has occurred (including no migration of these substances from adjacent areas).
- Category 2 – Areas where only the release or disposal of petroleum products has occurred.
- Category 3 – Areas where release, disposal, and/or migration of hazardous substances has occurred, but at concentrations that do not require a removal or remedial response.

- Category 4 – Areas where release, disposal, and/or migration of hazardous substances has occurred, and all removal or remedial actions to protect human health and the environment have been taken.
- Category 5 – Areas where release, disposal, and/or migration of hazardous substances has occurred, and removal or remedial actions are under way, but all required remedial actions have not yet been taken.
- Category 6 – Areas where release, disposal, and/or migration of hazardous substances has occurred, but required actions have not yet been implemented.
- Category 7 – Areas that are not evaluated or require additional evaluation.

## 2.0 SITE LOCATION AND PHYSICAL DESCRIPTION

### 2.1 SITE LOCATION

The USAR Center is located in the southeast portion of Hamilton County, Tennessee, within the city limits of Chattanooga, Tennessee. The Site is located in a primarily residential and commercial area. Figure 1 in Appendix A shows a general site location map.

### 2.2 ASSET INFORMATION

Facility Name and Address:	Bonny Oaks – VAAP USAR Center (TN107) 6703 Bonny Oaks Drive, Buildings 228 and 229 Chattanooga, Tennessee 37421	
Property Owner:	United States Government	
Date of Ownership:	23 October 1941	
Current Occupant:	212 <sup>th</sup> Transportation Company 591 <sup>st</sup> Transportation Detachment	
Zoning:	M-1 Manufacturing	
County, State:	Hamilton, Tennessee	
USGS Quadrangle(s):	East Chattanooga, Tennessee	
Section/Township/Range:	Not Applicable	
Latitude/Longitude:	35° 4' 17.0" N	85° 9' 21.6" W
Property Description:	The USAR Center consists of one parcel of land. A copy of the deed, which includes a legal description, is provided in Appendix C.	

### 2.3 PHYSICAL DESCRIPTION

The USAR Center is situated on approximately one acre of land with two permanent structures: Building 228 is a 5,822 square-foot administration building and Building 229 is a 4,775 square-foot reserve training building. A third building, designated as Building 202, is located east of Building 228, but is not part of the USAR Center. Only buildings 228 and 229 and approximately one acre of associated land are part of the BRAC transfer. Six container express (CONEX) storage units were located on the north side

of Building 228. These CONEX units are shown in Photograph 1 in Appendix B. The construction date of Building 228 is unknown but is believed to be in the mid-1970s. Building 229 was reportedly constructed in 1972. Both structures consist of concrete block walls covered with a brick veneer. Both buildings rest upon concrete foundations. A parking area is also contained within the Site. Photograph 2 in Appendix B shows a view of the parking area. Approximately two-thirds of the Site is covered by impervious surface features (e.g., asphalt parking areas, driveways, concrete walkways, building footprints, etc.). The remaining ground surface is covered by lawn area and a sparse population of deciduous trees and bushes. Topographically, the Site is relatively flat with gradual relief to the west and steeper slopes on the south and west sides of the Site. Figure 2 in Appendix A shows a current plan view layout of the Site.

Building 228 consists of a one-story, rectangular-shaped structure. Photographs 3 and 4 in Appendix B show views of the building's exterior. The interior of Building 228 consists of office space, classrooms, restrooms, storage, and an arms vault. Photographs 5 through 9 in Appendix B provide interior views of the storage areas in the Building 228. Figure 3 in Appendix A shows a layout of the interior of Building 228.

Building 229 is a one-story, rectangular-shaped structure. According to information provided by the Unit Administrator for the 591<sup>st</sup> Transportation Detachment, this building was formerly used as a training and orientation facility for employees of the VAAP while it was in operation. The building contains classrooms, storage rooms, restrooms, and office space. One of the storage rooms was used for nuclear, biological, and chemical (NBC) materials; however, no NBC materials were present at the time of the August 2006 site visit. Photograph 10 in Appendix B shows the front (south) view of Building 229. Photographs 11 through 20 in Appendix B show the interior storage areas of Building 229. Figure 4 in Appendix A shows a layout of the interior of Building 229.

The CONEX units were reported to contain unused equipment and supplies slated for disposal or shipment to other facilities. The CONEX units were locked and the keys were not available at the time of the 14 August 2006 site visit. The CONEX units are shown in Photograph No. 1 in Appendix B.

## **2.4 SITE HYDROLOGY AND GEOLOGY**

Figure 5 in Appendix A shows a portion of the East Chattanooga, Tennessee, USGS topographic map which includes the Site. As shown, the Site is situated at an elevation of approximately 735 feet above mean sea level and is relatively flat.

Stormwater sheet flows to storm drains and grassed drainage ditches on the south and west sides of the Site. No surface water features are located in the immediate vicinity of the Site. An unnamed tributary of Friar Branch, located approximately ¼ mile west of the Site, and Poe Branch, located approximately ¼ mile east of the Site, drain the western portion of the VAAP. The general surface water flow in the site vicinity would

likely be to the west-southwest toward the tributary of Friar Branch. General surface water flow for the western portion of the VAAP, which includes the former manufacturing and disposal areas and the USAR Center, is south-southwest. Chickamauga Lake, an impoundment of the Tennessee River, is the closest major surface water feature.

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map 47065C0359F, Panel 359, the Site is not included in the 100-year floodplain elevation or the 500-year floodplain elevation. Figure 6 in Appendix A provides a map depicting the extent of the nearest 100-year and 500-year floodplain in relation to the Site.

The Site is situated on the western flank of the Valley and Ridge physiographic region in Tennessee. Bedrock generally consists of limestone, dolomitic limestone, and dolomite belonging to the Chickamauga Limestone and Knox Dolomite Formations, which represent the Silurian and Ordovician geologic periods. The underlying bedrock is complexly folded and faulted. Groundwater in the area generally migrates through the secondary porosity features such as fractures and bedding plane partings in the bedrock and via primary porosity in the alluvial deposits and deeper soils in the valleys. Groundwater flow typically mirrors the natural surface drainage patterns in the area. The groundwater flow direction at the Site would likely be to the south-southwest similar to the general surface water drainage of the western portion of the VAAP. Some karst drainage exists in the general area. Karst drainage features such as dissolution channels and cavities and may affect the groundwater flow patterns and the transport of documented contaminants in the site area.

The Soil Conservation Service mapped the specific types of soil at the Site as the Fullerton Group, which do not meet the requirements for hydric soils. The Fullerton Group soils are generally cherty, silt loams. These soil types have moderate infiltration rates and are characterized as moderately deep to deep, moderately well to well drained soils with moderately coarse textures. In a typical profile, the surface layer varies from 0 to 15 inches thick while the subsoil is approximately 4 inches or more in thickness and is a cherty – silty clay loam to a cherty clay.

## **2.5 SITE UTILITIES**

**Water Service** – The American Water Company provides potable water service to the Site.

**Sanitary Sewer System** – The City of Chattanooga provides sanitary sewer service to the Site.

**Electric Service** – The Chattanooga Electrical Power Board provides electric service to the Site.

**Natural Gas Service** – The City of Chattanooga provides natural gas service to the Site.

## **2.6 WATER SUPPLY WELLS & SEPTIC SYSTEMS**

Based upon a review of available historical site and agency records and interviews with site personnel, neither a water supply well nor a septic system is or was located at the Site.

## **3.0 SITE HISTORY**

### **3.1 HISTORY OF OWNERSHIP**

Land titles for the Site were reviewed back to 1937. Appendix C contains a historical chain of title report that was completed for the Site. The United States Government acquired the property in 1941 for the VAAP. However, the chain of title for 6703 Bonny Oaks Drive covered the adjacent property that was transferred to Hamilton County. The Site is a portion of a 15-acre tract that was transferred from the Army Materiel Command to the USAR in 1999. This portion of the 15-acre tract, currently owned by the USAR, includes buildings 228 and 229 and approximately one acre of associated land.

### **3.2 PAST USES AND OPERATIONS**

The Site occupies a small portion of the former VAAP. The VAAP was a government-owned, contractor-operated facility built for the production of trinitrotoluene (TNT). The original plant was constructed on 5,410 acres of land by the USACE between 1941 and 1943, where it operated until 1945. It was relocated between 1952 and 1957 and again between 1969 and 1975. The 81<sup>st</sup> Regional Readiness Command (RRC) reportedly owns an approximately 15-acre tract of the former VAAP that includes the subject site, as well as the AMSA facility located to the north of the Site. This ECP report includes buildings 228 and 229 and the associated one acre of land. Buildings 228 and 229 were reportedly built in the 1970s and used for storage and administration activities.

Aerial photographs dated 1977, 1985, and 1999 (Figures 7, 9, and 10 in Appendix A) were reviewed as part of the site history research. No significant changes in the Site or the immediately adjacent area were observed from the photographs over that time period.

U.S. Geological Survey 7.5 Minute topographic maps for the East Chattanooga quadrangle for the years 1958 and 1969 (Figures 8 and 5 in Appendix A) were also reviewed. No significant changes in the Site or the immediately adjacent area were observed from the topographic maps over that time period.

### **3.3 PAST USE, STORAGE, DISPOSAL AND RELEASE OF HAZARDOUS SUBSTANCES**

#### **3.3.1 Past Use and Storage of Hazardous Substances**

Information pertaining to the past use and storage of hazardous substances at the USARC was compiled through review of available site records, searches of Federal and State environmental database and interviews with Army Reserve personnel.

Based on available information, it appears that chemical usage at the Site was limited to building maintenance products. There is no evidence that hazardous substances above reportable quantities were stored for 1 year or more at the Site.

### **3.3.2 Past Disposal and Release of Hazardous Substances**

Information pertaining to past disposal and release of hazardous substances at the Site was compiled through review of available site records, search of Federal and State environmental databases and interviews with Army Reserve personnel. According to the Army Reserve personnel and limited site records, there is no evidence that hazardous substances above reportable quantities were released or disposed at the Site. No stained soil, stressed vegetation or other visible indications of on-site disposal or releases were observed during the 14 August 2006 site visit.

### **3.4 PAST PRESENCE OF BULK PETROLEUM STORAGE TANKS**

FMSM did not encounter documentation or indications that underground storage tanks (UST) or above ground storage tanks (AST) are present or have historically been present on the Site.

### **3.5 REVIEW OF PREVIOUS ENVIRONMENTAL REPORTS**

A review of site records produced several reports pertaining to the Site. The following subsections provide a brief summary of these reports. Copies of the reports, unless otherwise specified, are provided in Appendix D.

#### **3.5.1 2000 Installation Action Plan for Volunteer Army Ammunition Plant**

This report provided general information on the VAAP and specific information on the manufacturing and disposal areas requiring remediation. The former manufacturing areas are located approximately 3/4 mile north of the Site, and the former disposal area is located approximately 2.5 miles north-northeast of the Site. Surface water runoff from the former manufacturing and disposal areas flows to the unnamed tributary of Friar Branch and to Poe Branch, which are the nearest surface water features to the USAR Center. Since the Site was located outside the manufacturing and disposal areas, no site-specific information was found. Because of its large volume and marginal relevance to the Site, this report has not been included in Appendix D.

#### **3.5.2 2001 Site Visit Report – 110 Acre Site, Army Reserve Property, Bonny Oaks Drive, Chattanooga, Tennessee**

This report dealt with a 110-acre area approximately 1/8 mile west of the USAR Center. The report concluded that the documented contamination by TNT compounds in this area was due to contaminated groundwater that had migrated from the former

manufacturing areas of the VAAP, which are located approximately 3/4 mile north of the report study area and the USAR Center. Because of its large volume and marginal relevance to the Site, this report has not been included in Appendix D.

### **3.5.3 1999 Environmental Baseline Study**

This report deals with the 15-acre tract that contains the USAR Center and concluded that "There is no evidence of environmental liabilities such as a release of petroleum or hazardous substances on-site. In addition, there appears to be no evidence of release in the site vicinity". The study did not examine potential groundwater contamination from off-site sources.

### **3.5.4 2001 Radon Test Results**

The results of radon tests conducted in 2001 showed the radon concentration in Buildings 228 and 229 to be 0.7 and 2.0 picoCuries per liter (pCi/l), respectively. These values are below the U.S. Environmental Protection Agency (USEPA) recommended action level of 4 pCi/l.

### **3.5.5 2001 Asbestos Report**

This report identified friable asbestos-containing material (ACM) in the form of thermal system insulation (TSI) rope packing and non-friable ACM in the form of sheetrock mud, floor tile and mastic, and vent duct mastic in Building 228. The report identified non-friable ACM in the form of sheetrock mud, floor tile and mastic, and vent duct mastic in Building 229. The report indicated that the non-friable ACM in both buildings was in good condition, however the friable ACM in Building 228 was damaged and removal was recommended.

### **3.5.6 2002 Air Quality Memorandum**

A 2002 air quality survey by the 81<sup>st</sup> Regional Support Command (RSC) concluded that there were no stationary or mobile air pollution sources that would require a permit under Title V of the Clean Air Act.

### **3.5.7 2001 UST Closure Report**

A 2001 UST closure report shows that the closure of the USTs and associated piping adjacent to the Site met the Tennessee requirements for a "non-contaminated closure". The report and conclusions were accepted by the Tennessee Department of Environment and Conservation in a letter dated 31 May 2001.

### **3.5.8 2004 Lead-Based Paint (LBP) Survey Report**

A March 2004 LBP survey included Buildings 228 and 229. LBP was identified in both buildings on interior and exterior doors and casings, door and window lintels, and structural steel components. The condition of the painted surfaces was not noted in the report.

#### 4.0 ADJACENT PROPERTIES

Figure 10 in Appendix A provides the most recent available aerial view of the Site and adjacent properties. Table 1 provides a list of adjacent properties with their directional location in regards to the Site. The zoning of the adjacent parcels is also listed in Table 1.

<b>Direction From Site</b>	<b>Name/Type of Property</b>	<b>Address</b>	<b>Zoning</b>
North	Military – AMSA	Hickory Valley Drive	M-1
South	Municipal – Hamilton Co. Board of Education	Hickory Valley Drive	M-1
East	Municipal – Hamilton Co. Board of Education, Bus Compound	Hickory Valley Drive	M-1
West	Undeveloped	Hickory Valley Drive	M-1

Appendix A and Appendix E provide historical aerial photographs, topographic maps, and EDR Reports, which were used to evaluate potential environmental impacts on adjacent properties that may have also impacted the environmental condition at the Site. Land use at the adjacent properties does not appear to have changed significantly over the past twenty years and does not appear to have had an adverse effect on the environmental conditions of the USAR Center.

Some of the land at the former VAAP was utilized for the manufacture of TNT from the 1940s through the 1970s. Groundwater investigations have been conducted mainly in the western area of the former VAAP, where the TNT manufacturing facilities were located. A remedy, institutional controls and monitored natural attenuation, has been implemented for the south TNT area groundwater basin, which is located 3/4 mile north of the USAR Center. FMSM did not encounter documentation of groundwater sampling and testing at the Site.

## 5.0 REVIEW OF REGULATORY INFORMATION

A component of the ECP is the review of reasonably obtainable Federal, State and local government records for the Site and surrounding properties, where there has been a release or likely release of a hazardous substance or a petroleum product, and which is likely to cause or contribute to a release or threatened release of a hazardous substance or a petroleum product on the Federal real property. A regulatory database summary was acquired from EDR on 25 July 2006. The regulatory database summary consolidates standard Federal, State, local and tribal environmental records sources based on ASTM recommended minimum search distances from the Site. A copy of the complete EDR Report is included in Appendix E.

### 5.1 FEDERAL ENVIRONMENTAL RECORDS

The regulatory information presented in Table 2 was obtained from the EDR Federal regulatory database report.

TABLE 2 FEDERAL DATABASE SEARCH								
Database	Search Distance (miles)	Target Site	<1/8	1/8 – 1/4	1/4 – 1/2	1/2 – 1	>1	Total Plotted

RAATS	TP		NR	NR	NR	NR	0	0

TP = Target Property, NR = Not Required

The Site appears on the CERCLIS, RCRA Small Quality Generator, PADS and FINDS database. However, it appears that it is listed on these databases due to past actions at the manufacturing and waste disposal areas on the former Volunteer Army Ammunition Plant and not due to activities on or adjacent to the Site.

## 5.2 STATE AND LOCAL ENVIRONMENTAL RECORDS

The regulatory information presented in Table 3 was obtained from the EDR State and local regulatory database search report. The facilities identified by this database search are discussed in the following subsections.

TABLE 3 STATE DATABASE SEARCH								
Database	Search Distance (miles)	Site	<1/8	1/8 – 1/4	1/4 – 1/2	1/2 – 1	>1	Total Plotted
State Haz. Waste	1.000		0	0	0	0	NR	0
State Landfill	0.500		0	0	0	NR	NR	0
LUST	0.500		0	0	0	NR	NR	0

CDL	Site		NR	NR	NR	NR	NR	0
Dry Cleaners	0.250		NR	NR	NR	NR	NR	0

NR = Not Required

### 5.2.1 Registered USTs Site Within 1/4 mile

The UST database contains registered USTs that are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The search identified 12 USTs formerly owned by the 81<sup>st</sup> RSC at Building 232 on the AMSA facility north of the Site. A review of other available reports showed that these tanks were removed in 2001 and all USTs received “Non-Contaminated Closure” status from the Tennessee Department of Environment and Conservation (TDEC).

### 5.2.2 Inquiries to State and Local Agencies

Letters of inquiry were sent to the TDEC and Hamilton County, Tennessee, environmental agencies. The only response received at the time of this report was from Chattanooga Hamilton County Air Pollution Bureau, which had no records, permits, or enforcement issues with the Site.

### 5.3 TRIBAL RECORDS

The regulatory information presented in Table 4 was obtained from the EDR Tribal database search report.

TABLE 4 TRIBAL DATABASE SEARCH								
Database	Search Distance (miles)	Target Site	<1/8	1/8 – 1/4	1/4 – 1/2	1/2 – 1	>1	Total Plotted
Indian Reservation	1.000		0	0	0	0	NR	0
Indian LUST	0.500		0	0	0	NR	NR	0
Indian UST	0.250		0	0	NR	NR	NR	0

NR = Not Required

The database search did not identify any sites within the designated search radius.

### 5.4 EDR PROPRIETARY RECORDS

The regulatory information presented in Table 5 was obtained from the EDR's Proprietary Records database search report.

**TABLE 5  
 EDR PROPRIETARY DATABASE SEARCH**

Database	Search Distance (miles)	Target Site	<1/8	1/8 – 1/4	1/4 – 1/2	1/2 – 1	>1	Total Plotted
Manufactured Gas Plants	1.000		0	0	0	0	NR	0
EDR Historical Auto Stations	0.250		0	0	NR	NR	NR	0
EDR Historical Cleaners	0.250		0	0	NR	NR	NR	0

NR = Not Required

The database search did not identify any sites within the designated search radius.

### 5.5 UNMAPPED SITES

The EDR database search listed thirty-nine unmapped sites. Unmapped sites are facilities with insufficient address information to enable them to be located and mapped, and they can only be identified as within the zip code of the Site. None of the unmapped sites were observed within 1/4 mile of the USAR Center during a reconnaissance drive of the site vicinity and were not located on the former VAAP property. Based on the local geology and hydrology, facilities located greater than 1/4 mile from the Site to the east, south and west should not have an adverse impact on the environmental condition of the USAR Center.

### 5.6 SUMMARY OF PROPERTIES EVALUATED TO DETERMINE RISK TO THE SITE

Based on an evaluation of available site information and details concerning the properties listed in the database searches, none of the facilities evaluated are believed to be "High Risk". "High Risk" properties are those that exhibit significant environmental conditions that have the probability of adversely affecting the environmental conditions at another site. Adjacent properties were not identified as "High Risk." The former VAAP manufacturing facilities were not identified or mapped by the databases in the EDR report.

## **6.0 SITE VISIT AND REVIEW OF ENVIRONMENTAL CONDITIONS**

Findings documented in the following subsections are based on the 14 August 2006 site visit and area reconnaissance, a review of available site records, and information obtained from U.S. Army Reserve personnel.

### **6.1 UNDERGROUND/ABOVEGROUND STORAGE TANKS**

FMSM did not encounter documentation or indications that underground storage tanks or above ground storage tanks are present or have historically been present on the Site.

### **6.2 INVENTORY OF CHEMICALS / HAZARDOUS SUBSTANCES**

At the time of the site visit, the Building 228 contained a small amount of petroleum, oil and lubricants (POL) used in building maintenance activities. A small quantity of POL, which is used in the maintenance of small arms, was observed in the arms vault. Janitorial cleaning supplies were used and stored in both buildings. There is no evidence that hazardous substances above reportable quantities were stored for 1 year or more, released or disposed at the Site.

### **6.3 WASTE DISPOSAL SITES**

There were no signs of landfilling or illegal waste disposal activities at the Site during the August 2006 site visit.

### **6.4 PITS, SUMPS, DRYWELLS, AND CATCH BASINS**

No sumps were observed during the August 2006 site visit. Floor drains were present in the mechanical room of the administration building. No grease trap was observed during the August 2006 site visit. The sanitary wastewater collection and conveyance structures appear to merge so that all sources of sanitary wastewater exit the Site at one location. Stormwater sheet flows drain towards the south and west.

Standing water was observed in the grassy areas at the north end of buildings 228 and 229. The standing water has a sheen and has somewhat of a musty odor. Army personnel at the Site stated that this area was constantly wet year round. The odor and sheen appear to be the result of natural processes rather than VAAP impact. Nitroaromatics, the organic compounds of concern at the VAAP are characterized by yellow, orange, and red colors.

### **6.5 ASBESTOS-CONTAINING MATERIAL**

An asbestos survey was conducted in December 2001. The survey confirmed that ACM are located in both buildings. The survey noted the occurrence of ACM in the

following materials in Building 228: non-friable ACM in the form of sheetrock joint compound, floor tile mastic and vent duct mastic and friable ACM in the form of TSI rope packing. The survey noted the occurrence of ACM in Building 229 in the form of non-friable sheetrock joint compound, floor tile, floor tile mastic and vent duct mastic. The report noted the ACM was in good condition except for the friable TSI rope packing, which was damaged. During the site visit floor tiles, sheetrock mud and vent ducts were observed to be in good condition. The TSI rope packing was not observed during the August 2006 site visit.

## **6.6 POLYCHLORINATED BIPHENYL (PCB) CONTAINING EQUIPMENT**

During the August 2006 site visit, older-style fluorescent light fixtures were observed in the administration and training buildings. Older fixtures, especially those that are original to the Site, could potentially contain PCBs. Ballasts that are not marked "No PCBs" should be assumed to contain PCBs and should be managed in accordance with applicable local, State, and Federal regulations.

A total of nine pole-mounted electrical transformers were observed on the Site. One set of three transformers is located on a pole on the north end of Building 229, one set of three transformers is located on a pole on the north end and slightly east of Building 229, and one set of three transformers is located on a pole in the southeast corner of the Site. The transformers did not have stickers indicating their PCB status. The transformers were observed to be in good condition with no apparent indications of leakage or staining. The electric service provider, the Chattanooga Electric Power Board, is the owner of the transformers and would be responsible for the maintenance and remediation of the transformers.

## **6.7 LEAD-BASED PAINT**

A 2004 survey report indicated that LBP was identified in both buildings on interior and exterior doors and casings, door and window lintels, and structural steel components. These painted surfaces were observed to be in good condition at the time of the site visit.

## **6.8 RADON**

The results of radon tests conducted in 2001 showed the radon concentration in Buildings 228 and 229 to be 0.7 and 2.0 picoCuries per liter (pCi/l), respectively. These values are below the USEPA recommended action level of 4.0 pCi/l.

## **6.9 MUNITIONS AND EXPLOSIVES OF CONCERN**

No indications were found during the August 2006 site visit or during the review of records to indicate the current or past presence of munitions and explosives of concern

(MEC), including unexploded ordnance (UXO), at the Site. Only small arms ammunition, which is not considered MEC, has been reported to be stored at the Site in the arms vault.

#### **6.10 RADIOLOGICAL MATERIALS**

A radioactive materials sign was noted in the eastside supply room in Building 229 during the site reconnaissance. The 212<sup>th</sup> Transportation Company has hand-held radiation detectors stored in this supply room. These units reportedly have a small radioactive source. Site personnel reported that the source does not require a Nuclear Regulatory Commission radioactive materials license or permit. There is no evidence to suggest that any radiological commodities were improperly managed at the Site or that any radionuclides were released.

## **7.0 REVIEW OF SPECIAL RESOURCES**

### **7.1 LAND USE**

Figure 10 in Appendix A provides the most recent aerial view of the USAR Center and surrounding properties and depicts current land use. The Site is zoned for manufacturing (M-1).

### **7.2 COSTAL ZONE MANAGEMENT**

According to the National Oceanic and Atmospheric Administration webpage, there is no coastal boundary in Tennessee. Due to the distance between the Site and the coast, activities at the Site would not impact sensitive coastal resources.

### **7.3 WETLANDS**

The U.S. Fish and Wildlife Service (USFWS) National Wetlands Inventory (NWI) map shows that no jurisdictional wetlands are identified on the Site or its adjacent properties. The nearest wetland is located approximately 150 feet west of the Site. In addition, according to the EDR Report, soils at the Site are classified as Fullerton cherty-silt loam; these soils do not meet the requirements of a hydric soil. Based on a review of the NWI map and soils information, it is not likely that any jurisdictional wetlands occur on the Site. Figure 11 in Appendix A provides an NWI map illustrating wetlands in the immediate vicinity.

### **7.4 100-YEAR FLOODPLAIN**

A review of the Federal Emergency Management Agency digital Flood Hazard Area map indicates that the Site lies outside the 100-year floodplain, with the nearest floodplain boundary located approximately 1/2 mile south of the Site. This floodplain is associated with the Poe Branch. Figure 6 in Appendix A shows the most recently updated Flood Insurance Rate Map of the site location.

### **7.5 NATURAL RESOURCES**

According to the USFWS, the species listed in Table 6 are known to occur in Hamilton County, Tennessee. No determination concerning the occurrences of these species or their potential habitat is rendered here.

**TABLE 6  
 FEDERALLY THREATENED AND ENDANGERED SPECIES  
 KNOWN TO OCCUR IN HAMILTON COUNTY, TENNESSEE**

Common Name	Scientific Name	Federal Status
Gray Bat	<i>Myotis grisescens</i>	Endangered
Cumberland monkeyface Pearly mussel	<i>Quadrula intermedia</i>	Endangered
Dromedary pearly mussel	<i>Dromus dromas</i>	Endangered
Fine-rayed pigtoe	<i>Fusconaia cunelous</i>	Endangered
Orangefoot pimpleback	<i>Plethobasus cooperianus</i>	Endangered
Pink mucket pearly mussel	<i>Lampsillis orbiculata</i>	Endangered
Rough pigtoe	<i>Pleurobema plenum</i>	Endangered
Tuberculed-blossom pearly mussel	<i>Epioblasma torulosa torulosa</i>	Endangered
Large-flowered skullcap	<i>Scutellaria Montana</i>	Endangered
Small-whorled pogonia	<i>Isotria medeoloides</i>	Threatened
Virginia spirea	<i>Spiraea virginiana</i>	Threatened
Snail darter	<i>Percina tanasi</i>	Threatened
Bald Eagle	<i>Haliaeetus leucocephalus</i>	Threatened

**7.6 CULTURAL RESOURCES**

There are no available site-specific cultural resources reports. The Site does not appear on the National Register of Historic Places. Because of the age of the buildings on-site, they do not appear to be eligible for listing at this time.

**7.7 OTHER SPECIAL RESOURCES**

A review of other special resources was conducted, which included a search for various federally managed and protected lands within or near the Site. The Site is not within an Officially Designated Wilderness Area according to wilderness.net. It is not within a

National Wetlands Management District according to the USFWS. The National Park Service does not include the Site on the Wild and Scenic Rivers list.

## 8.0 CONCLUSIONS

FMSM was contracted by the USACE Louisville District to prepare an ECP Report for the Bonny Oaks – VAAP USAR Center located at 6703 Bonny Oaks Drive in Chattanooga, Tennessee. The USAR consists of two permanent structures. The 591<sup>st</sup> Transportation Detachment and the 212<sup>th</sup> Transportation Company currently occupy the Site.

Findings of this ECP are based on existing environmental information, including visual observations, site records, interviews with USAR personnel, Federal, State and local databases and file information, related to the storage, release, treatment, or disposal of hazardous substances or petroleum products or derivatives on the property. The following paragraphs present the findings related to the environmental conditions of property that were evaluated during the ECP process.

- **Use and Storage of CERCLA Hazardous Substances** – Based on available documents, the use and storage of CERCLA hazardous substances was limited to building maintenance chemicals. There is no evidence that hazardous substances above reportable quantities were stored for 1 year or more, released or disposed at the Site.
- **Petroleum Product Storage** – FMSM did not encounter documentation or indications that ASTs or USTs were located on the Site.
- **Wash Water Discharge** – There are no known vehicle wash racks at the Site.
- **Polychlorinated Biphenyl Transformer** – The PCB content of the nine pole-mounted transformers located on the Site is unknown. The transformers were observed to be in good condition with no indications of leakage or staining at the time of the site visit. These transformers are the property of the Chattanooga Electric Power Board and any releases are their responsibility.
- **PCB Equipment** – No specific reports were available for PCB equipment. Given the age of the building, the presence of PCB equipment, such as fluorescent light ballasts, is possible. Fluorescent light ballasts that are not marked “No PCBs” should be assumed to contain PCBs and should be managed in accordance with applicable local, State, and Federal regulations.
- **Asbestos** – Friable and non-friable ACM were identified in Building 228 and non-friable ACM was identified in Building 229 in a 2001 Asbestos Inspection Report. The non-friable ACM in both buildings was observed to be in good condition during the site visit. The friable ACM in Building 228, TSI rope packing, was reported to be damaged. The friable TSI rope packing was not observed during the site reconnaissance.

- **Radon** – Radon testing results from 2001 indicated that the radon concentrations were 0.7 pCi/l and 2.0 pCi/l in Buildings 228 and 229, respectively. The USEPA recommended action level is 4.0 pCi/l.
- **Lead-Based Paint** – A 2004 survey report indicated that LBP was identified in both buildings on interior and exterior doors and casings, door and window lintels, and structural steel components. These painted surfaces were observed to be in good condition at the time of the site visit.
- **Munitions and Explosives of Concern** – No indications were found during the August 2006 site visit or the records review process of the past or current presence of MEC, including UXO, at the Site.
- **Radiological Materials** – Hand-held radiation detectors are stored in the eastside supply room in Building 229. These units reportedly have a small radioactive source. Site personnel reported that the source does not require a Nuclear Regulatory Commission radioactive materials license or permit. There is no evidence to suggest that any radiological commodities were improperly managed at the Site or that any radionuclides were released.
- **Surrounding Properties** – While the Site was outside of the former manufacturing and waste disposal areas at the VAAP, there is a possibility that contaminated groundwater has migrated to the Site from these areas. The nearest former manufacturing area is located approximately ¾ mile north of the Site and groundwater contamination from TNT compounds has been documented on another USAR-owned parcel approximately 1/8 mile west of the Site. The local surface water drainage flows to the south-southwest on the western portion of the former VAAP, which includes the former manufacturing and disposal areas and the USAR Center. The groundwater flow direction in the site area would likely be to the south-southwest similar to the general surface water drainage of the western portion of the VAAP. Some karst drainage exists in the general area and may affect the groundwater flow patterns in the site area. Based on review of published information, groundwater investigations have been conducted for the former manufacturing areas and a remediation plan, based on institutional controls and monitored natural attenuation, is in effect for the southern portion of the south TNT area groundwater basin. However, no specific information could be found regarding the groundwater conditions at the Site.

## ENVIRONMENTAL CONDITION OF PROPERTY

In accordance with Department of Defense policy defining the classifications (See Deputy Under Secretary of Defense Goodman Memorandum dated 21 October 1996), the Property has been classified as Category 4, an area where release, disposal, and/or

migration of hazardous substances has occurred, and all removal or remedial actions to protect human health and the environment have been taken. This classification is based on the possible TNT contaminant migration to the Site from the former VAAP manufacturing areas. A remediation plan has been implemented for the southern portion of the south TNT area groundwater basin and no further remedial action is necessary.

## 9.0 LIMITATIONS

This ECP Report was prepared to review certain elements of the environmental condition of property related to the storage, release, treatment, or disposal of hazardous substances or petroleum products. It documents efforts to determine or discover the presence or likely presence of a release or threatened release of these materials. Project activities were performed in general conformance with the BRRM, ASTM D6008 guidance, the project prescribed scope of work, and generally accepted practices in the consulting industry. The degree of care and skill is consistent with that generally exercised in the industry under similar conditions.

FMSM has relied on certain information provided by the USACE, USAR, and other parties referenced in the report. This information was assumed to be accurate and complete unless information to the contrary arose during the course of the investigation. Historic documentation (e.g., information on past environmental practices, environmental records, USARC operational changes, unit and equipment changes, chemical/substance inventories and storage, current as-built drawings, etc.) and facility personnel knowledge regarding chemicals used or stored on the Site and the quantities stored, was often limited or non-existent. Therefore, statements regarding storage of chemicals or presence of hazardous substances reflect best available data and are not warranted for either completeness or accuracy over the history of the facility.

In preparing this report, FMSM was required to review previous documents from other sources (collectively referred to herein as the Prior Reports). The Prior Reports may present findings regarding the abatement or remediation of known concerns at the time of their preparation or within the limit of the project scope of work. The Prior Reports may include statements or opinions of the original authors of the Prior Reports as to the satisfactory completion of work. FMSM notes that environmental laws and regulations, including abatement or remedial action levels, are periodically reviewed and updated by the various regulatory agencies and may have changed since the respective dates of the Prior Reports.

FMSM has summarized Prior Reports in fulfilling the prescribed scope of work for the project. This summarization may include statements or opinions as to the satisfactory completion of work. These statements or opinions are those of the original report authors. FMSM neither warrants nor certifies the accuracy or completeness of these statements. The summarization of previous documents has not reviewed or updated those conclusions with regards to actions from the time of that document to date, current regulatory agency abatement, or remedial standards. Rather, this summary provides the original author's conclusions at the time the report was prepared. Evaluation of the completeness of previous documents or statements of abatement or remediation is beyond the current scope of service included in this contract.

A limited site reconnaissance was performed to visually identify materials or conditions representing recognized adverse environmental conditions. Identification of hidden conditions, observation of the effects of activities or incidents occurring after completion of the reconnaissance, buried conditions, conditions obscured by dense foliage, conditions beneath buildings, other structures, or covered by building/paving materials, or conditions otherwise obscured, is beyond the scope of this work. The conditions described in this report are valid only for the time that the observations were made. Some conditions may change with time.

The findings and conclusions contained in this report are based in part on the information available at the time of the study. The findings and conclusions should be considered not as scientific certainties, but as probabilities based on professional judgment of the significance of the limited data gathered in the course of the site evaluation, interviews and literature review. If additional or corrected information becomes available, FMSM requests the opportunity to review/modify conclusions, as warranted.

RETURN ATAI

QUITCLAIM DEED

The UNITED STATES OF AMERICA, acting by and through the Secretary of the Interior, acting by and through the Southeast Regional Director, National Park Service, under and pursuant to the power and authority contained in the provisions of the Federal Property and Administrative Services Act of 1949 (63 Stat. 377), as amended, and particularly as amended by Public Law 485, 91st Congress, and regulations and orders promulgated thereunder (hereinafter designated "Grantor"), for and in consideration of the perpetual use of the hereinafter described premises for public park and public recreation area purposes by the City of Chattanooga, Tennessee and Hamilton County, Tennessee (hereinafter designated "Grantee"), does hereby release and quitclaim to Grantee, and to its successors and assigns, subject to the reservations, exceptions, restrictions, conditions and covenants hereinafter expressed and set forth, all Grantor's right, title and interest in and to the following approximately 2,757 acres of described property (Property), known as a portion of the Volunteer Army Ammunition Plant, Chattanooga, Hamilton County, Tennessee, more particularly described in Enclosure A, attached hereto and made a part hereof.

OK 01517

SUBJECT TO any and all existing rights-of-way for public roads, highways, utilities, pipelines and easements and covenants affecting the above-described premises, whether or not the same now appear of record, including but not limited to an easement with Tennessee Valley Authority for two (2) transmission lines, an easement with Colonial Pipeline Company for a pipeline, and a water line easement with Eastside Utility District.

TO HAVE AND TO HOLD the hereinbefore described Property, subject to the reservations, exceptions, restrictions, conditions and covenants herein expressed and set forth unto the Grantee, its successors and assigns, forever.

On September 24, 2003 the United States Department of the Army determined the Property to be excess to its needs and therefore pursuant to authority contained in the Federal Property and Administrative Services Act of 1949, as amended, and applicable rules, regulations and orders promulgated thereunder, the General Services Administration assigned the Property to the Department of the Interior for further conveyance to the City of Chattanooga, Tennessee and Hamilton County, Tennessee.

U

It is agreed and understood by and between the Grantor and Grantee, and the Grantee, by its acceptance of this deed, does acknowledge its understanding of the agreement, and does covenant and agree to itself, and its successors and assigns, forever, as follows:

1. The Property shall be used and maintained for the public purposes for which it was conveyed in perpetuity as set forth in the Program of Utilization and plan contained in the application, submitted by the Grantee on October 20, 1999, which program and plan may be amended from time to time at the request of either the Grantor or Grantee, with the written concurrence of the other party, and such amendments shall be added to and become a part of the original application.

2. The Grantee shall, within 6 months of the date of this deed of conveyance, erect and maintain a permanent sign or marker near the point of principal access to the Property which says:

This park land was acquired through the FEDERAL LANDS TO PARKS PROGRAM of the United States Department of the Interior, National Park Service, for the public's recreational use and enjoyment.

3. The Property shall not be sold, leased, assigned, or otherwise disposed of except to another eligible governmental agency that the Secretary of the Interior agrees in writing can assure the continued use and maintenance of the Property for public park or public recreational purposes subject to the same terms and conditions in the original instrument of conveyance. Any mortgage, lien, or any other encumbrance not wholly subordinate to the reverter interest of the Grantor shall constitute an impermissible disposal. However, this provision shall not preclude the Grantee and its successors or assigns from issuing revenue or other bonds related to the use of the Property to the extent that such bond shall not in any way restrict, encumber, or constitute a lien on the property. Further, nothing in this provision shall preclude the Grantee from providing related recreational facilities and services compatible with the approved application, through concession agreements entered into with third parties, provided prior concurrence to such agreements is obtained in writing from the Secretary of the Interior.

4. From the date of this conveyance, the Grantee, its successors and assigns, shall submit biennial reports to the Secretary of the Interior, setting forth the use made of the Property during the preceding 2-year period, and other pertinent data establishing its continuous use for the purposes set forth

above, for ten consecutive reports and as further determined by the Secretary of the Interior.

5. All revenue received by the Grantee through concession agreements, use permits, or other fees generated by activities on the Property shall be used only for the implementation of an approved Program of Utilization or the operation of park and recreation facilities and programs on the Property. After the Program of Utilization is completed, and as long as the Property is properly and sufficiently operated and maintained, the revenue may be used for other public park and recreational purposes by the Grantee. Any revenue received by the Grantee which is generated on or by the operation of the Property shall not be used for non-recreational purposes. Any revenue received by the Grantee which is generated through the operation of the Property shall be listed and accounted for in its biennial reports to the National Park Service.

6. The Grantor, and any representative it may so delegate, shall have the right of entry upon the Property at any time to conduct inspections of the Property for the purpose of evaluating the Grantee's compliance with the terms and conditions of this deed.

7. As part of the consideration for the Deed, the Grantee covenants and agrees for itself, its successors and assigns, that (1) the program for or in connection with which this Deed is made will be conducted in compliance with, and the Grantee, its successors and assigns, will comply with all requirements imposed by or pursuant to the regulations of the Department of the Interior in effect on the date of this Deed (43 C.F.R. Part 17) issued under the provisions of Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d-1); (2) this covenant shall be subject in all respects to the provisions of said regulations; (3) the Grantee, its successors and assigns, will promptly take and continue to take such action as may be necessary to effectuate this covenant; (4) the United States shall have the right to seek judicial enforcement of this covenant, and (5) the Grantee, its successors and assigns, will (a) obtain from each other person (any legal entity) who, through contractual or other arrangements with the Grantee, its successors and assigns, is authorized to provide services or benefits under said program, a written agreement pursuant to which such other person shall, with respect to the services or benefits which he is authorized to provide, undertake for himself the same obligations as those imposed upon the Grantee, its successors and assigns, by this covenant, and (b) furnish a copy of such agreement to the Secretary of the Interior, or his successor; and that this covenant shall run with the land hereby conveyed, and shall in any event, without regard to technical

classification or designation, legal or otherwise, be binding to the fullest extent permitted by law and equity for the benefit of, and in favor of the Grantor and enforceable by the Grantor against the Grantee, its successors and assigns.

8. The Grantee agrees to comply with the requirements of Public Law 90-480 (82 Stat. 718), the Architectural Barriers Act of 1968, as amended by Public Law 91-205 of 1970 (84 Stat. 49), and the Americans with Disabilities Act of 1990 (104 Stat. 337) to assure that development of facilities on the Property are accessible to the physically handicapped; and, further assure in accordance with Public Law 93-112, the Rehabilitation Act of 1973 (87 Stat. 394), that no otherwise qualified handicapped individual shall solely by reasons of his handicap be excluded from the participation in, be denied benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.

9. The Grantee shall be on the lookout for archeological artifacts during any construction activities on the Property and shall take appropriate action should any artifacts be discovered. Grantee shall comply with the provisions of 36 C.F.R. Part 800, regarding protection of historic and cultural properties. Grantee's development plans shall avoid sites identified by a Cultural Resources Assessment of the Property, and, prior to any alteration or construction on the Property, Grantee shall consult with the Tennessee State Historic Preservation Office. Further, Grantee agrees and covenants for itself, its successors, and assigns and every successor in interest to the Property, or any part thereof, that the Property is subject to the conditions, restrictions, and limitations set forth in the document entitled "Preservation Covenant For the Conveyance of Volunteer Army Ammunition Plant Historical Properties" (2 pages), which is attached as Enclosure D and incorporated by reference, and agrees to comply with the restrictive covenants and restrictions enumerated in Enclosure D.

10. The Grantee covenants and agrees to comply with the National Environmental Policy Act of 1969, as amended, the 1977 Amendments to the Federal Water Pollution Control Act (Clean Water Act of 1977), the Federal Disaster Protection Act of 1973 (87 Stat. 975), Executive Order 11268, relating to the evaluation of flood hazards, Executive Order 11990 (May 24, 1977) for Protection of Wetlands and Executive Order 11988 (May 24, 1977) for Floodplain Management, and Grantee shall be subject to any use restrictions issued under said Amendments and Orders.

11. The document entitled "Finding of Suitability to Transfer (FOST) for the 2800 Acres for Conveyance to the City of

Chattanooga/Hamilton County, and the University of Tennessee at Chattanooga" dated September 9, 2003, which is attached hereto as Enclosure B, is incorporated by reference and the Grantee acknowledges receipt of this document by its executed acceptance of this deed.

12. The Grantee acknowledges that the Property contains a sanitary landfill which has been closed. Grantee agrees that the Department of the Army will continue to be responsible for post-closure activities at the landfill, including maintenance, inspection, and monitoring the post-closure plan. The Grantee agrees to allow the Department of the Army continued access to the landfill to conduct post-closure activities.

13. The Grantee acknowledges that the Property contains numerous Corbetta-type storage magazines which were used for storing packaged boxes of TNT. The Grantee acknowledges receipt of the Department of the Army's report entitled "Decontamination of Storage Magazine" which was prepared by Tecumseh Professional Associates in August 2003. The Grantee agrees that it will be responsible for, and will report the discovery of any ordinance or environmental hazard on the Property to the Department of the Army.

14. In connection with CERCLA Section 120(h), Grantor advises the Grantee that hazardous materials were stored on the Property. The Grantee acknowledges receipt of the document entitled "Environmental Restrictions" (4 pages), which is attached as Enclosure C and incorporated by reference, and agrees to comply with the restrictive covenants and restrictions enumerated in Enclosure C. Enclosure C includes required CERCLA deed provisions.

15. CERCLA COVENANTS AND NOTICE: Pursuant to Section 120(h)(3) of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended, 42 U.S.C. Section 9601, et seq. ("CERCLA"):

A. Notification and Covenants

1. The Grantor hereby notifies the Grantee of the storage, release and disposal of hazardous substances on the Property. For the purpose of this Deed, "hazardous substances" shall have the meaning attributed to such term under Section 101(14) of CERCLA, 42 U.S.C. 9601(14). Available information regarding the type, quantity, and location of such hazardous substances and action taken to address such hazardous substances is described at Table 2 of the Finding of Suitability to Transfer.

2. The Grantor hereby covenants that:

- a. All remedial action necessary to protect human health and the environment with respect to any such hazardous substances remaining on the Property has been taken before the date of conveyance hereunder; and
- b. Any additional remedial action found to be necessary with regard to such hazardous substances remaining on the Property after the date of this Deed that resulted from past activities of the Grantor shall be conducted by the Grantor. This covenant shall not apply to the extent such remedial actions are caused by activities of the Grantee, its successors or assigns.

B. Access Rights and Easement

The Grantor, the Environmental Protection Agency (EPA), Region IV, and Tennessee Department of Environmental and Conservation and their officers, agents, employees, contractors, and subcontractors have the right to enter upon the Property in any case in which remedial action or corrective action is found to be necessary after the date of this Deed, or such access is necessary to carry out a response action on adjoining property, including, without limitation, the following purposes:

- To conduct investigations and surveys, including, where necessary, drilling, soil and water sampling, testing-pitting, test soil borings and other activities;
- To inspect field activities of the government and its contractors and subcontractors;
- To conduct any test or survey related to the environmental conditions at the Property or to verify any data submitted to the EPA or TDEC by the government relating to such conditions;
- To construct, operate, maintain or undertake any other response or remedial actions as required or necessary including, but not limited to monitoring wells, pumping wells and treatment facilities.

In exercising these rights of access, except in case of imminent endangerment to human health or the environment, the Grantor shall give the Grantee, or the then record owner, reasonable notice of actions to be taken in remediation of the Property.

16. Lead-Based Paint. (A) The Grantor represents after diligent inquiry, and the Grantee, and each of its successors and assigns, acknowledges, that all portions of the improvements on the Property subject to this Quitclaim Deed may include lead-based paint ("LBP") as of the date of this Quitclaim Deed. Every purchaser of any interest in real property on which a building was built prior to 1978, is notified that such property may present exposure to lead from LBP that may place young children at risk of developing lead poisoning. Lead poisoning in young children may produce permanent neurological damage, including learning disabilities, reduced intelligence quotients, behavioral problems, and impaired memory. Lead poisoning also poses a particular risk to pregnant women. The seller of any interest in residential real property is required to provide the buyer with any information on LBP hazards from risk assessments or inspections in the seller's possession and notify the buyer of any known LBP hazards. "Residential real Property" means dwelling units, common areas, building exterior surfaces, and any surrounding land, including outbuildings, fences and play equipment affixed to the land, available for use by residents but not including land used for agricultural, commercial, industrial, or other non-residential purposes, and not including paint on the pavement of parking lots, garages, or roadways and buildings visited regularly by the same child, 6 years of age or under, on at least two different days within any week, including day-care centers, preschools and kindergarten classrooms.

(B) Available information concerning known LBP and/or LBP hazards, the location of LBP and/or LBP hazards, and the condition of painted surfaces, contained in the Environmental Baseline Survey (Final Revised Report dated 09 October 1998 and updated 12 November 1999) have been provided to the Grantee. All purchasers must receive the federally approved pamphlet on lead poisoning prevention. The Grantee hereby acknowledges receipt of all of the information described in this subparagraph.

(C) A risk assessment or inspection for possible LBP hazards is recommended prior to converting the Property to a residential dwelling. The Grantee acknowledges that it has received the opportunity to conduct its own risk assessment or inspection for the presence of LBP and/or LBP hazards prior to execution of this document.

(D) The Grantee covenants and agrees that it shall not permit the occupancy or use of any buildings or structures on the Property as Residential Real Property, as defined in subparagraph (a), above, without complying with this paragraph and all applicable federal, state, and local laws and regulations pertaining to LBP and/or LBP hazards. Prior to permitting the occupancy of the Property where its use subsequent to sale is intended for residential habitation, the Grantee specifically agrees to perform, at its sole expense, the Army's abatement requirements under Title X of the Housing and Community Development Act of 1992 (Residential Lead-Based Paint Hazard Reduction Act of 1992) (hereinafter Title X).

The Grantee shall, after consideration of the guidelines and regulations established pursuant to Title X: (1) Perform a re-evaluation of the Risk Assessment if more than 12 months have elapsed since the date of the last Risk Assessment; (2) Comply with the joint HUD and EPA Disclosure Rule (24 C.F.R. 35, Subpart H, 40 C.F.R. 745, Subpart F), when applicable, by disclosing to prospective purchasers the known presence of LBP and/or LBP hazards as determined by previous risk assessments; (3) Abate lead dust and LBP hazards in pre-1960 residential real property, as defined in subparagraph (A), above, in accordance with the procedures in 24 C.F.R. 35; (4) Abate soil-lead hazards in pre-1978 residential real property, as defined in subparagraph (A), above, in accordance with the procedures in 24 C.F.R. 35; (5) Abate lead-soil hazards following demolition and redevelopment of structures in areas that will be developed as residential real property; (6) Comply with the EPA LBP work standards when conducting LBP activities (40 C.F.R. 745, Subpart L); (7) Perform the activities described in this paragraph within 12 months of the date of the LBP risk assessment and prior to occupancy or use of the residential real property; and (8) Send a copy of the clearance documentation to the Grantor.

In complying with these requirements, the Grantee covenants and agrees to be responsible for any abatement or remediation of LBP or LBP hazards on the Property found to be necessary as a result of the subsequent use of the Property for residential purposes. The Grantee covenants and agrees to comply with solid or hazardous waste laws that may apply to any waste that may be generated during the course of LBP abatement activities.

(E) The Grantor assumes no liability for damages for personal injury, illness, disability, or death to the Grantee, or to Grantee's successors, assigns, employees, invitees, or any other person, including members of the general public, arising from or incident to the future purchase, transportation, removal, handling, use, disposition, or other activity causing or leading to contact

of any kind whatsoever with LBP on the Property after the date of this Quitclaim Deed, whether the Grantee, its successors or assigns, has properly warned or failed to properly warn the individual(s) injured. Consistent with the foregoing, Grantee and its successors and assigns shall not have liability for (i) any violations of laws or regulations relating to LBP occurring prior to the date of this Quitclaim Deed, or (ii) any releases of or exposure to LBP occurring before the date of this Quitclaim Deed. Further, the Grantee shall be responsible for abating all LBP hazards prior to occupancy of the Property by children six (6) years of age and under, as described in 24 C.F.R. § 35.24.

(F) The covenants, restrictions and requirements of this paragraph shall be binding upon the Grantee, its successors and assigns and all future owners and shall be deemed to run with the land. The Grantee on behalf of itself, its successors and assigns covenants that it will include and make legally binding, this paragraph, in all subsequent transfers, leases or conveyance documents.

17. Groundwater. (A) Restrictions and conditions: In order to ensure current groundwater quality conditions are maintained, the Grantee covenants for itself, its successors, and assigns not to access or use groundwater underlying the Property. For the purpose of this restriction, "groundwater" shall have the same meaning as in section 101(12) of CERCLA. The Grantee, for itself, its successors or assigns covenants that it will not undertake nor allow any activity on or use of the Property that would violate the restrictions contained herein. These restrictions and covenants are binding on the Grantee, its successors and assigns; shall run with the land; and are enforceable by the Tennessee Department of Environment and Conservation (TDEC), or successor agencies. Any approval granted by TDEC to allow a restricted use or to amend or lift these restrictions and covenants shall be in writing, must contain a reference to this instrument, and shall be filed with the Hamilton County Register of Deeds. Until such time as all remediation on the Property is complete, to include long term monitoring, the Army will receive written notice of any such requests to allow a restricted use or amend or lift these restrictions and covenants and the Army shall be given reasonable opportunity to review and provide comment to the regulatory agencies on such requests.

(B) Enforcement: The restrictions and conditions stated in subsection (A) benefit the public in general and the territory surrounding the Property, including lands retained by the United States, and therefore, are enforceable by the State of Tennessee. The Grantee covenants for itself, its successors, and assigns that it shall include and otherwise make legally binding, the

restrictions in all subsequent lease, transfer or conveyance documents relating to the Property.

(C) Army Access: Grantor reserves a right of access to all portions of the Property for environmental investigation, remediation or other corrective action. This reservation includes the right of access to and use of available utilities at reasonable cost to Grantor. These rights shall be exercisable in any case in which a remedial action, response action or corrective action is found to be necessary after the dates of this conveyance, or in which access is necessary to carry out a remedial action, response action, or corrective action on adjoining property. Pursuant to this reservation, the United States of America, and its respective officers, agents, employees, contractors and subcontractors shall have the right (upon reasonable advance written notice to the record title owner) to enter upon the Property and conduct investigations and surveys, to include drilling, test-pitting, borings, data and records compilation and other activities related to the environmental investigation, and to carry out remedial or removal actions as required or necessary, including but not limited to the installation and operation of monitoring wells, pumping wells, and treatment facilities. The property owner shall allow ingress and egress of all equipment necessary to accomplish the same.

18. Restricted to Recreational/Educational Use: The Department of the Army has undertaken careful environmental study of the Property and concluded, to which the Grantee agrees, that the highest and best use of the Property is for nonresidential use. In order to further the common objectives and land use plans of the United States, State of Tennessee, and Grantee, the Grantee agrees with the following restrictions and conditions.

(A) Restrictions and Conditions: The Grantee covenants for itself, its successors, and assigns not to use the Property for residential purposes. The Grantee, for itself, its successors or assigns, covenants that it will not undertake nor allow any activity on or use of the Property that would violate the restrictions contained herein. These restrictions and covenants are binding on the Grantee, its successors and assigns; shall run with the land; and are forever enforceable. Nothing contained herein shall preclude the Grantee from undertaking, in accordance with applicable laws and regulations and without any cost to the Grantor, such additional investigation or remediation necessary to allow for residential use of the Property. Upon completion of such investigation or remediation required to allow residential use of the Property and upon the grantee's obtaining the approval of the TDEC and, if required, any other regulatory agency (i.e., the

Environmental Protection Agency), the Grantor agrees, without cost to the United States to release or, if appropriate, modify this restriction by recordation of an amendment hereto (however, release from this restriction does not release the Grantee from the requirement to use the Property for public park and public recreation area purposes in perpetuity).

(B) Enforcement: The restrictions and conditions benefit the public in general and the territory surrounding the Property, including lands retained by the United States, and, therefore, are enforceable by the State of Tennessee. The Grantee covenants for itself, its successors, and assigns that it shall include and otherwise make legally binding, the restrictions in all subsequent lease, transfer or conveyance documents relating to the Property.

19. Notice of unexploded ordnance (UXO) Clearance: Based upon a review of existing records and available information, none of the buildings and/or land transferred is known to contain UXO. In the event Grantee, its successors and assigns, should discover any ordnance on the Property, it shall not attempt to remove or destroy it, but shall immediately notify the local Police Department and competent Grantor, or Grantor designated explosive ordnance personnel will be dispatched promptly to dispose of such ordnance at no expense to the Grantee.

20. Inclusion of Environmental Provisions: The Grantee acknowledges, agrees and covenants for itself, its successors and assigns and every successor in interest to the Property that it shall neither transfer, lease, nor grant any interest, privilege, or license whatsoever in connection with the Property without the inclusion of paragraphs 11, 12, 13, 14, 15, 16, 17, 18 and 19 of this Deed, and shall require the inclusion of such environmental protection provisions in all further deeds, transfers, leases, or grant of any interest, privilege, or license.

21. The Grantee shall comply with all applicable Federal, State, and local laws, regulations and standards that are or may become applicable to the Grantee's activities on the property being conveyed.

22. The Grantee acknowledges and covenants for itself, its successors and assigns and every successor in interest to the Property that there is a cemetery located on the Property and it agrees that pursuant to Tennessee law and this covenant to allow public access to the cemetery at reasonable times; to not disturb the cemetery; to not permit dismemberment of any entombment without the express consent of the heirs or unless as a result of court action; and to maintain the cemetery grounds, including

at a minimum biannual mowing.

23. The Grantee covenants for itself, its successors and assigns, and every successor in interest to the property herein described, or any part thereof, that any construction or alteration is prohibited unless a determination of no hazard to air navigation is issued by the Federal Aviation Administration in accordance with Title 14, Code of Federal Regulation, Part 77, entitled "Objects Affecting Navigable Airspace", or under authority of the Federal Aviation Act of 1958, as amended.

24. The Grantee agrees to provide the University of Tennessee suitable access to approximately 200 acres of adjacent property located east of the Property. The University of Tennessee property located east of the Property was formerly a portion of the Volunteer Army Ammunition Plant.

25. In the event there is a breach of any of the conditions and covenants herein contained by the Grantee, its successors and assigns, whether caused by the legal or other inability of the Grantee, its successors and assigns, to perform said conditions and covenants, or otherwise, all right, title and interest in and to said premises shall revert to and become the property of the Grantor at its option, which in addition to all other remedies for such breach shall have the right of entry upon said premises, and the Grantee, its successors and assigns, shall forfeit all right, title and interest in said premises and in any and all of the tenements, hereditaments and appurtenances thereunto belonging; provided, however, that the failure of the Secretary of the Department of the Interior to require in any one or more instances complete performance of any of the conditions or covenants shall not be construed as a waiver or relinquishment of such future performance, but the obligation of the Grantee, its successors and assigns, with respect to such future performance shall continue in full force and effect. The Grantee, by its acceptance of this deed, covenants and agrees for itself, and its successors and assigns, that in the event the Grantor exercises its option to revert all right, title, and interest in the property to the Grantor, or the Grantee voluntarily returns title to the property in lieu of a reverter, then the Grantee shall provide protection to and maintenance of said property at all times until such time as the title is actually reverted or returned to and accepted by the Grantor, including the period of any notice of intent to revert. Such protection and maintenance shall, at a minimum, conform to the standards prescribed by the General Services Administration in its Federal Property Management Regulations, 41 C.F.R. 101 - 47.402, in effect at the time of the reversion.

IN WITNESS WHEREOF, the Grantor has caused these presents to be executed in its name and on its behalf this the 13<sup>th</sup> day of JULY, 2004.

THENCE South 78 degrees, 28 minutes, 58 seconds West a distance of 441.32 feet to a point;  
THENCE North 86 degrees, 17 minutes, 29 seconds West a distance of 460.91 feet to a point;  
THENCE South 51 degrees, 21 minutes, 25 seconds West a distance of 512.34 feet to a point;  
THENCE South 51 degrees, 33 minutes, 21 seconds West a distance of 369.87 feet to a point;  
THENCE South 89 degrees, 58 minutes, 24 seconds East a distance of 686.53 feet to the point of curvature;  
THENCE with a curve the left (counter clockwise) an arc distance of 642.49 feet, having a radius of 3456.25 feet, a central angle of 10 degrees, 39 minutes, 03 seconds and a chord of South 65 degrees, 56 minutes, 46 seconds West for a distance of 641.56 feet to the point of tangent.  
THENCE South 60 degrees, 37 minutes, 15 seconds West a distance of 1835.54 feet to a point;

THENCE North 00 degrees, 58 minutes, 21 seconds East a distance of 907.22 feet to a point;

THENCE North 24 degrees, 48 minutes, 16 seconds West a distance of 756.94 feet to a point;

THENCE North 67 degrees, 01 minutes, 58 seconds East a distance of 424.50 feet to a point;

THENCE North 24 degrees, 14 minutes, 01 seconds West a distance of 1047.32 feet to a point;

THENCE North 47 degrees, 29 minutes, 19 seconds East a distance of 1179.14 feet to a point;

THENCE North 63 degrees, 19 minutes, 53 seconds East a distance of 150.02 feet to a point;

THENCE North 34 degrees, 03 minutes, 52 seconds East a distance of 614.65 feet to a point;

THENCE North 36 degrees, 24 minutes, 00 seconds West a distance of 714.58 feet to a point;

THENCE North 00 degrees, 19 minutes, 29 seconds East a distance of 679.75 feet to the point of curvature;

THENCE with a curve to the left (counter clockwise) an arc distance of 251.91 feet, having a radius of 324.50 feet, a central angle of 44 degrees, 28 minutes, 41 seconds, and a chord of North 21 degrees, 54 minutes, 48 seconds West, for a distance of 245.63 feet to the point of tangent;

THENCE North 44 degrees, 09 minutes, 12 seconds West a distance of 681.98 feet to the point of curvature;

THENCE with a curve to the right (clockwise) an arc distance of 258.80 feet, having a radius of 273.39 feet, a central angle of 54 degrees, 14 minutes, 14 seconds, and a chord of North 17 degrees, 02 minutes, 05 seconds West, for a distance of 249.25 feet to the point of tangent;

THENCE North 10 degrees, 05 minutes, 02 seconds East a distance of 152.26 feet to a point;

THENCE North 58 degrees, 03 minutes, 05 seconds East a distance of 1472.82 feet to a point;

THENCE North 04 degrees, 09 minutes, 17 seconds West a distance of 733.65 feet to a point;

THENCE North 67 degrees, 58 minutes, 06 seconds West a distance of 929.02 feet to a point;

THENCE North 09 degrees, 51 minutes, 53 seconds East a distance of 4114.33 feet to a point;

THENCE North 68 degrees, 08 minutes, 38 seconds West a distance of 1281.03 feet to a point;

THENCE South 14 degrees, 52 minutes, 55 seconds West a distance of 2559.01 feet to a point;

THENCE South 30 degrees, 59 minutes, 37 seconds West a distance of 530.61 feet to a point;

THENCE North 17 degrees, 51 minutes, 22 seconds West a distance of 688.30 feet to the point of curvature;

THENCE with a curve to the left (counter clockwise) an arc distance of 557.17 feet, having a radius of 854.93 feet, a central angle of 37 degrees, 20 minutes, 25 seconds, and a chord of North 36 degrees, 31 minutes, 35 seconds West, for a distance 547.36 feet to the point of tangent;

THENCE North 55 degrees, 11 minutes, 47 seconds West a distance of 400.75 feet to the point of curvature;

THENCE with a curve to the right (clockwise) an arc distance of 680.83 feet, having a radius of 1054.93 feet, a central angle of 36 degrees, 58 minutes, 38 seconds, and a chord of North 36 degrees, 42 minutes, 28 seconds West, for a distance of 669.07 feet to the point of tangent;

THENCE North 18 degrees, 13 minutes, 09 seconds West a distance of 1221.89 feet to the point of curvature;

THENCE with a curve to the left (counter clockwise) an arc distance of 847.01 feet, having a radius of 1045.95 feet, a central angle of 46 degrees, 23 minutes, 54 seconds, and a chord of North 41 degrees, 26 minutes, 06 seconds West, for a distance of 824.04 feet to the point of tangent;

THENCE North 64 degrees, 37 minutes, 03 seconds West a distance of 1481.60 feet to the point of curvature;

THENCE with a curve to the right (clockwise) an arc distance of 514.53 feet, having a radius of 689.76 feet, and a central angle of 42 degrees, 44 minutes, 24 seconds, and a chord of North 43 degrees, 14 minutes, 51 seconds West, for a distance of 502.68 feet to the point of tangent;

THENCE North 21 degrees, 52 minutes, 39 seconds West a distance of 391.37 feet to a point located on the Southeastern margin of Tennessee State Highway #58;

THENCE with a curve to the right (clockwise) along the Southeastern margin of Highway 58 an arc distance of 200.12 feet, having a radius of 5872.58 feet, a central angle of 01 degrees, 57 minutes, 09 seconds, and a chord of North 66 degrees, 13 minutes, 42 seconds East, for a distance of 200.11 feet to a point;

THENCE South 21 degrees, 52 minutes, 39 seconds East a distance of 397.98 feet to the point of curvature;

THENCE with a curve to the left (counter clockwise) an arc distance of 365.34 feet, having a radius of 489.76 feet, a central angle of 42 degrees, 44 minutes, 24 seconds, and a chord of South 43 degrees, 14 minutes, 51 seconds East, for a distance of 356.93 feet to the point of tangent;

THENCE South 64 degrees, 37 minutes, 03 seconds East a distance of 1481.60 feet to the point of curvature;

THENCE with a curve to the right (clockwise) an arc distance of 1008.98 feet, having a radius of 1246.95 feet, a central angle of 48 degrees, 23 minutes, 54 seconds and a chord of South 41 degrees, 25 minutes, 04 seconds East, for a distance of 981.60 feet to the point of tangent;

THENCE South 18 degrees, 13 minutes, 09 seconds East a distance of 390.47 feet to a point;

THENCE North 56 degrees, 20 minutes, 42 seconds East a distance of 1306.96 feet to a point;

THENCE North 22 degrees, 55 minutes, 30 seconds West a distance of 210.42 feet to the POINT OF BEGINNING.

Said property herein described contains 2,666.75 Acres, more or less.

---

T.D.O.T. ACQUISITION TRACT

Subject to a road way easement known as the T.D.O.T. Acquisition Tract being more particularly described as follows:

BEGINNING at a concrete monument marked B-102-2 in the Southeastern boundary of Tract "E" of the Volunteer Army Ammunition Plant (VAAP) Boundary Survey as prepared by Arcadis, Goraghty, and Miller, dated September 15, 1999, said concrete monument is also located on the current Northwestern road right-of-way of U.S. Interstate Highway 75 at centerline highway station 408+54.50, 440.74 feet left of centerline highway. monument B-102-2 has coordinates of North=271,201.65 and East=2,234,157.91, coordinates, bearings, and distances are based on NAD 83 Tennessee Grid Coordinate System and referenced to the Chattanooga-Hamilton County Monument Network (CHAM System);

THENCE South 53 degrees, 28 minutes, 05 seconds West for a distance of 500.92 feet along the existing Northwestern road right-of-way of U.S. Interstate Highway 75 to a point;

THENCE South 53 degrees, 25 minutes, 35 seconds West for a distance of 602.29 feet along the existing Northwestern road right-of-way of U.S. Interstate Highway 75 to a point, said point is located at centerline highway station 398+24.19, 289.77 feet left of centerline highway;

THENCE North 38 degrees, 59 minutes, 34 seconds East for a distance of 475.06 feet to a point;

THENCE North 18 degrees, 42 minutes, 57 seconds West for a distance of 93.02 feet to the point of curvature;

THENCE with a non-tangential curve to the left (counter clockwise) having an arc length of 165.51 feet, a radius of 1,100.00 feet, a central angle of 08 degrees, 37 minutes, 15 seconds, and a chord of North 68 degrees, 33 minutes, 07 seconds West for a distance of 165.35 feet to a point on curve;

THENCE with a non-tangential curve to the left (counter clockwise) having an arc length of 1,111.20 feet, a radius of 1,100.00 feet, a central angle of 57 degrees, 52 minutes, 45 seconds, a chord of South 78 degrees, 08 minutes, 01 seconds West for a distance of 1,064.55 feet to a point located at the end of curve;

THENCE South 49 degrees, 11 minutes, 42 seconds West for a distance 16.01 feet to a point;

THENCE North 35 degrees, 23 minutes, 38 seconds West for a distance of 519.46 feet to a point;

THENCE North 47 degrees, 16 minutes, 38 seconds East for a distance of 16.08 feet to the point of curvature;

THENCE with a non-tangential curve to the right (clockwise) having an arc length of 1,666.10, a radius of 1,500.00 feet, a central angle of 63 degrees, 38 minutes, 25 seconds, and a chord of North 79 degrees, 06 minutes, 01 seconds East for a distance of 1,581.77 feet to a point on curve;

THENCE with a non-tangential curve to the right (clockwise) having an arc length of 247.20 feet, a radius of 1,500.00 feet, a central angle of 09 degrees, 26 minutes, 32 seconds, and a chord of South 64 degrees, 18 minutes, 50 seconds East for a distance of 246.92 feet to a point located at the end of curve;

THENCE North 57 degrees, 43 minutes, 18 seconds East for a distance of 148.00 feet to a point;

THENCE North 57 degrees, 43 minutes, 35 seconds East for a distance of 195.58 feet to the point of curvature;

THENCE with a non-tangential curve to the right (clockwise) having an arc length of 757.25 feet, a radius of 871.31 feet, a central angle of 49 degrees, 47 minutes, 43 seconds, and a chord of North 82 degrees, 36 minutes, 39 seconds East for a distance of 733.64 feet to a point located at the end of curve;

THENCE South 73 degrees, 24 minutes, 26 seconds East for a distance of 285.71 feet to a point located on the existing Northwestern road right-of-way of U.S. interstate Highway 75;

THENCE South 63 degrees, 45 minutes, 57 seconds West for a distance of 110.48 feet along the existing Northwestern road right-of-way of U.S. Interstate Highway 75 to a point;

THENCE South 63 degrees, 51 minutes, 07 seconds West for a distance of 502.08 feet along the existing Northwestern road right-of-way of U.S. Interstate Highway 75 to a point;

THENCE South 63 degrees, 45 minutes, 14 seconds West for a distance of 428.87 feet along the existing Northwestern road right-of-way of U.S. Interstate Highway 75 to the POINT OF BEGINNING.

Said T.D.O.T. Acquired Right-of-Way herein described contains 33.295 acres, more or less.

---

VOLUNTEER ORDNANCE CONNECTOR ROAD  
LOCATION ONE

Subject to a road way easement for the Volunteer Ordnance Connector Road, 200.00 feet in width being more particularly described as follows:

COMMENCING at a concrete monument marked B-102-2 in the Southeastern boundary of Tract "E" of the Volunteer Army Ammunition Plant (VAAP) Boundary Survey as prepared by Arcadis, Geraghty, and Miller, dated September 15, 1999, said concrete monument is also located on the current Northwestern road right-of-way of U.S. Interstate Highway 75 at centerline highway station 408+54.50, 440.74 feet left of centerline highway, monument B-102-2 has coordinates of North=271,201.65 and East=2,234,157.91, coordinates, bearings, and distances are based on NAD 83 Tennessee Grid Coordinate System and referenced to the Chattanooga-Hamilton County Monument Network (CHAM System);

THENCE South 53 degrees, 28 minutes, 05 seconds West for a distance of 500.92 feet along the existing Northwestern road right-of-way of U.S. Interstate Highway 75 to a point;

THENCE South 53 degrees, 25 minutes, 35 seconds West for a distance of 602.29 feet along the existing Northwestern road right-of-way of U.S. Interstate Highway 75 to a point, said point is located at centerline highway station 398+24.19, 289.77 feet left of centerline highway;

THENCE North 38 degrees, 59 minutes, 34 seconds East for a distance of 475.06 feet to a point;

THENCE North 18 degrees, 42 minutes, 57 seconds West for a distance of 93.02 feet to the point of curvature;

THENCE with a non-tangential curve to the left (counter clockwise) having an arc length of 165.51 feet, a radius of 1,100.00 feet, a central angle of 08 degrees, 37 minutes, 15 seconds, and a chord of North 68 degrees, 33 minutes, 07 seconds West for a distance of 165.35 feet to a point on curve;

THENCE with a non-tangential curve to the left (counter clockwise) having an arc length of 1,111.20 feet, a radius of 1,100.00 feet, a central angle of 57 degrees, 52 minutes, 45 seconds, a chord of South 78 degrees, 08 minutes, 01 seconds West for a distance of 1,064.55 feet to a point located at the end of curve;

THENCE South 49 degrees, 11 minutes, 42 seconds West for a distance 16.01 feet to a point;

THENCE North 35 degrees, 23 minutes, 38 seconds West for a distance of 161.51 feet to the POINT OF BEGINNING, said POINT OF BEGINNING having coordinates of North=270,965.42 and East=2,232,239.03;

THENCE South 54 degrees, 36 minutes, 22 seconds West for a distance of 679.95 feet to the beginning point of a spiral curve,

THENCE with a spiral curve to the right (clockwise) having a beginning radius of 1,258.80 feet, a total central angle of 100 degrees, 45 minutes, 03 seconds, a central angle of spiral of 14 degrees, 05 minutes, 56 seconds, spiral tangent of 169.94 feet, and a chord of South 59 degrees, 25 minutes, 14 seconds West for a distance of 493.26 feet to the point of transition from spiral curve to equal radius curve;

THENCE with equal radius curve to the right (clockwise) having an arc length of 1,335.84 feet, a radius of 1,055.00 feet, a central angle of 72 degrees, 33 minutes, 11 seconds, and a chord of North 75 degrees, 01 minutes, 06 seconds West for a distance of 1,248.45 feet to the point of transition from equal radius curve to spiral curve;

THENCE with a spiral curve to the right (clockwise) having an ending radius of 1,258.80 feet, a total central angle of 100 degrees, 45 minutes, 03 seconds, a central angle of spiral of 14 degrees, 05 minutes, 56 seconds, spiral tangent of 169.94 feet, and a chord of North 29 degrees, 27 minutes, 25 seconds West for a distance of 493.26 feet to the end point of spiral curve;

THENCE North 24 degrees, 38 minutes, 34 seconds West for a distance of 447.21 feet to a point located on the Southeastern boundary line of the Volunteer Army Ammunition Plant property known as Area "A";

THENCE North 47 degrees, 26 minutes, 19 seconds East for a distance of 210.20 feet along the Southeastern boundary line of the Volunteer Army Ammunition Plant property known as Area "A";

THENCE South 24 degrees, 38 minutes, 34 seconds East for a distance of 511.88 feet to the point of spiral curve;

THENCE with a spiral curve to the left (counter clockwise) having a beginning radius 1,058.80 feet, a total central angle of 100 degrees, 45 minutes, 03 seconds, central spiral angle 14 degrees, 05 minutes, 56 seconds, spiral tangent of 145.21 feet, and a chord of South 29 degrees, 12 minutes, 36 seconds East for a distance of 444.21 feet to the point of transition from spiral curve to equal radius curve;

THENCE with a curve to the left (counter clockwise) an arc distance of 1,082.68 feet, an equal radius of 855.00 feet, a central angle of 72 degrees, 33 minutes, 11 seconds, and a chord of South 75 degrees, 01 minutes, 06 seconds East for a distance of 1,011.78 feet to the point of transition from equal radius curve to spiral curve;

THENCE with a spiral curve to the left (counter clockwise) having an ending radius 1,058.80 feet, a total central angle of 100 degrees, 45 minutes, 03 seconds, central spiral angle 14 degrees, 05 minutes, 56 seconds, spiral tangent of 145.21 feet, and a chord of North 59 degrees, 10 minutes, 25 seconds East for a distance of 444.21 feet to the end point of spiral curve;

THENCE North 54 degrees, 36 minutes, 22 seconds East for a distance of 679.95 feet to a point;

THENCE South 35 degrees, 23 minutes, 38 seconds East for a distance of 200.00 feet to the POINT OF BEGINNING;

Said portion of road way easement for the Volunteer Ordnance Connector Road herein described contains 15.192 acres, more or less.

---

VOLUNTEER ORDNANCE CONNECTOR ROAD  
LOCATION TWO

Subject to a road way easement for the Volunteer Ordnance Connector Road, 200.00 feet in width being more particularly described as follows:

COMMENCING at a corner which is the point of beginning of the property described as ENCLOSURE "A";

THENCE South 22 degrees, 55 minutes, 30 seconds East for a distance of 210.42 feet along the boundary line of the ENCLOSURE "A" property to a point;

THENCE South 56 degrees, 20 minutes, 42 seconds West for a distance of 1306.96 feet along the boundary line of the ENCLOSURE "A" property to a point located on the Eastern margin of the Volunteer Ordnance Connector Road, said point marks the POINT OF BEGINNING;

THENCE South 18 degrees, 13 minutes, 09 seconds East for a distance of 831.42 feet along the Eastern margin of the Volunteer Ordnance Connector Road to the point of curvature;

THENCE with a curve to the left (counter clockwise) along the Eastern margin of the Volunteer Ordnance Connector Road an arc distance of 551.75 feet, a radius of 854.93 feet, a central angle of 36 degrees, 58 minutes, 39 seconds, and a chord of South 36 degrees, 42 minutes, 28 seconds East for a distance of 542.23 feet to the point of tangent;

THENCE South 55 degrees, 11 minutes, 47 seconds East for a distance of 400.75 feet along the Eastern margin of the Volunteer Ordnance Connector Road to the point of curvature;

THENCE with a curve to the right (clockwise) along the Eastern margin of the Volunteer Ordnance Connector Road an arc distance of 687.51 feet, a radius of 1,054.93 feet, a central angle of 37 degrees, 20 minutes, 25 seconds, and a chord of South 36 degrees, 31 minutes, 35 seconds East for a distance of 675.41 feet to the point of tangent;

THENCE South 17 degrees, 51 minutes, 22 seconds East for a distance of 513.52 feet along the Eastern margin of the Volunteer Ordnance Connector Road to the point located on the ENCLOSURE "A" boundary line;

THENCE South 30 degrees, 59 minutes, 37 seconds West for a distance of 285.61 feet along the ENCLOSURE "A" boundary line to a point located on the Western margin of the Volunteer Ordnance Connector Road;

THENCE North 17 degrees, 51 minutes, 22 seconds West a distance of 688.30 feet along the Western margin of the Volunteer Ordnance Connector Road to the point of curvature;

THENCE with a curve to the left (counter clockwise) along the Western margin of the Volunteer Ordnance Connector Road an arc distance of 557.17 feet, having a radius of 854.93 feet, a central angle of 37 degrees, 20 minutes, 25 seconds, and a chord of North 36 degrees, 31 minutes, 35 seconds West, for a distance 547.36 feet to the point of tangent;

THENCE North 55 degrees, 11 minutes, 47 seconds West a distance of 400.75 feet along the Western margin of the Volunteer Ordnance Connector Road to the point of curvature;

THENCE with a curve to the right (clockwise) along the Western margin of the Volunteer Ordnance Connector Road an arc distance of 680.83 feet, having a radius of 1054.93 feet, a central angle of 36 degrees, 58 minutes, 38 seconds, and a chord of North 36 degrees, 42 minutes, 28 seconds West, for a distance of 669.07 feet to the point of tangent;

THENCE North 18 degrees, 13 minutes, 09 seconds West a distance of 1221.89 feet along the Western margin of the Volunteer Ordnance Connector Road to the point of curvature;

THENCE with a curve to the left (counter clockwise) along the Western margin of the Volunteer Ordnance Connector Road an arc distance of 847.01 feet, having a radius of 1045.95 feet, a central angle of 46 degrees, 23 minutes, 54 seconds, and a chord of North 41 degrees, 25 minutes, 06 seconds West, for a distance of 824.04 feet to the point of tangent;

THENCE North 64 degrees, 37 minutes, 03 seconds West a distance of 1481.60 feet along the Western margin of the Volunteer Ordnance Connector Road to the point of curvature;

THENCE with a curve to the right (clockwise) along the Western margin of the Volunteer Ordnance Connector Road an arc distance of 514.53 feet, having a radius of 689.76 feet, and a central angle of 42 degrees, 44 minutes, 24 seconds, and a chord of North 43 degrees, 14 minutes, 51 seconds West, for a distance of 502.68 feet to the point of tangent;

THENCE North 21 degrees, 52 minutes, 39 seconds West a distance of 391.37 feet along the Western margin of the Volunteer Ordnance Connector Road to a point located on the Southeastern margin of Tennessee State Highway #58;

THENCE with a curve to the right (clockwise) along the Southeastern margin of Highway 58 an arc distance of 200.12 feet, having a radius of 5872.58 feet, a central angle of 01 degrees, 57 minutes, 09 seconds, and a chord of North 66 degrees, 13 minutes, 42 seconds East, for a distance of 200.11 feet to a point located on the Eastern margin of the Volunteer Ordnance Connector Road;

THENCE South 21 degrees, 52 minutes, 39 seconds East a distance of 397.98 feet along the Eastern margin of the Volunteer Ordnance Connector Road to the point of curvature;

THENCE with a curve to the left (counter clockwise) along the Eastern margin of the Volunteer Ordnance Connector Road an arc distance of 365.34 feet, having a radius of 489.76 feet, a central angle of 42 degrees, 44 minutes, 24 seconds, and a chord of South 43 degrees, 14 minutes, 51 seconds East, for a distance of 356.93 feet to the point of tangent;

THENCE South 64 degrees, 37 minutes, 03 seconds East a distance of 1481.60 feet along the Eastern margin of the Volunteer Ordnance Connector Road to the point of curvature;

THENCE with a curve to the right (clockwise) along the Eastern margin of the Volunteer Ordnance Connector Road an arc distance of 1008.98 feet, having a radius of 1245.95 feet, a central angle of 46 degrees, 23 minutes, 54 seconds and a chord of South 41 degrees, 25 minutes, 04 seconds East, for a distance of 981.60 feet to the point of tangent;

THENCE South 18 degrees, 13 minutes, 09 seconds East a distance of 390.47 feet along the Eastern margin of the Volunteer Ordnance Connector Road to POINT OF BEGINNING;

Said portion of road way easement for the Volunteer Ordnance Connector Road herein described contains 30.805 acres, more or less.

---

CEMETERY "5"

Subject to any existing cemetery known as Cemetery "5" as per survey by Arcadis, Geraghty, & Miller entitled Volunteer Army Ammunition Plant Boundary Surveys, dated September 15, 1999, said cemetery being more particularly described as follows:

COMMENCING at a concrete monument stamped AGM 173 at Tennessee State Grid Coordinates of North=276,958.188 and East=2,223,747.951;

THENCE North 62 degrees, 09 minutes, 19 seconds East for a distance of 9,209.01 feet to the POINT OF BEGINNING;

THENCE North 03 degrees, 10 minutes, 49 seconds West for a distance of 84.38 feet to a point;

THENCE South 86 degrees, 10 minutes, 18 seconds East for a distance of 59.83 feet to a point;

THENCE South 03 degrees, 06 minutes, 58 seconds East for a distance of 68.42 feet to a point;

THENCE South 78 degrees, 30 minutes, 46 seconds West for a distance of 59.94 feet to the POINT OF BEGINNING;

Said Cemetery "5" herein described contains 0.104 acres or 4,534 square feet, more or less.

---

RIGHT OF ACCESS TO CEMETERY "5"

Right of Access to Cemetery "5" as per survey by Arcadis, Geraghty, & Miller entitled Volunteer Army Ammunition Plant Boundary Surveys, dated September 15, 1999, being more particularly described as follows:

COMMENCING at a concrete monument stamped AGM 173 at Tennessee State Grid Coordinates of North=276,958.188 and East=2,223,747.951;

THENCE North 61 degrees, 21 minutes, 57 seconds East for a distance of 9,323.34 feet to the POINT OF BEGINNING;

THENCE North 03 degrees, 06 minutes, 58 seconds West for a distance of 85.78 feet to a point;

THENCE North 65 degrees, 27 minutes, 41 seconds East for a distance of 10.74 feet to a point;

THENCE South 03 degrees, 06 minutes, 58 seconds East for a distance of 90.93 feet to a point;

THENCE North 86 degrees, 10 minutes, 18 seconds West for a distance of 10.07 feet to the POINT OF BEGINNING.

---

TVA EASEMENT, LOCATION ONE

Subject to a TVA Electrical Transmission Line Easement, 150.00 feet in width known as the TVA Main Line Easement being more particularly described as follows:

COMMENCING at a point where the Southeastern margin of Tennessee State Highway 58 and the Northeastern margin of the Volunteer Ordnance Connector Road intersect;

THENCE South 21 degrees, 52 minutes, 39 seconds East for a distance of 107.39 feet along the Northeastern margin of the Volunteer Ordnance Connector Road to a point located on the Northwestern margin of the TVA Main Line Easement, said point marks the POINT OF BEGINNING;

THENCE South 21 degrees, 52 minutes, 39 seconds East for a distance of 150.37 feet along the Northeastern margin of the Volunteer Ordnance Connector Road to a point located on the Southeastern margin of the TVA Main Line Easement;

THENCE South 73 degrees, 05 minutes, 51 seconds West for a distance of 200.77 feet along the Southeastern margin of the TVA Main Line Easement to a point located on the Southwestern margin of the Volunteer Ordnance Connector Road;

THENCE North 21 degrees, 52 minutes, 39 seconds West for a distance of 150.57 feet along the Southwestern margin of the Volunteer Ordnance Connector Road to a point located on the Northwestern margin of the TVA Main Line Easement;

THENCE North 73 degrees, 06 minutes, 51 seconds East for a distance of 200.77 feet along the Northwestern margin of the TVA Main Line Easement to the POINT OF BEGINNING.

Said portion of the TVA Main Line Easement herein described contains 0.691 acres or 30,113 square feet, more or less.

---

TVA EASEMENT, LOCATION TWO

Subject to a TVA Electrical Transmission Line Easement, 150.00 feet in width known as the TVA Main Line Easement being more particularly described as follows:

BEGINNING at the same POINT OF BEGINNING as stated in the above ENCLOSURE "A" description, said point is located on the Northern margin of the TVA Main Line Easement;

THENCE South 68 degrees, 02 minutes, 50 seconds East for a distance of 4,787.15 feet along the Northern margin of the Northern margin of the TVA Main Line Easement to a point;

THENCE North 78 degrees, 56 minutes, 47 seconds East for a distance of 5,980.60 feet along the Northern margin of the Northern margin of the TVA Main Line Easement to a point;

THENCE North 65 degrees, 30 minutes, 13 seconds East for a distance of 1,031.38 feet along the Northern margin of the Northern margin of the TVA Main Line Easement to a point located on the Northeastern boundary line of the property described above as ENCLOSURE "A";

THENCE South 55 degrees, 57 minutes, 06 seconds East for a distance of 81.91 feet along the Northeastern boundary line of the ENCLOSURE "A" property to a point;

THENCE South 55 degrees, 56 minutes, 32 seconds East for a distance of 93.92 feet along the Northeastern boundary line of the ENCLOSURE "A" property to a point located on the Northern boundary line of Tract 11, U.T.C. Parcel and the Southern margin of the TVA Main Line Easement;

THENCE South 65 degrees, 30 minutes, 13 seconds West for a distance of 1,140.78 feet along the Southern margin of the TVA Main Line Easement to a point;

THENCE South 78 degrees, 56 minutes, 47 seconds West for a distance of 6,022.72 feet along the Southern margin of the TVA Main Line Easement to a point;

THENCE North 68 degrees, 02 minutes, 50 seconds West for a distance of 4,683.82 feet along the Southern margin of the TVA Main Line Easement to a point located on the Northwestern boundary line of the ENCLOSURE "A" property;

THENCE North 57 degrees, 20 minutes, 42 seconds East for a distance of 0.95 feet along the Northwestern boundary line of the ENCLOSURE "A" property to a point;

THENCE North 22 degrees, 55 minutes, 30 seconds West for a distance of 210.42 feet along the Northwestern boundary line of the ENCLOSURE "A" property to the POINT OF BEGINNING.

Said portion of the TVA Main Line Easement herein described contains 40.675 acres, more or less.

---

**TVA EASEMENT, LOCATION THREE**

Subject to a TVA Electrical Transmission Line Easement, 200.00 feet in width known as the TVA Eastern Line Easement being more particularly described as follows:

COMMENCING at a point located on the Eastern boundary line of the property described as ENCLOSURE "A" said point is also the Southeast corner of Tract 11, U.T.C. Parcel;

THENCE South 82 degrees, 34 minutes, 00 seconds West for a distance of 524.52 feet along the Southern boundary line of Tract 11, U.T.C. Parcel to a point located on the Eastern margin of the TVA Eastern Line Easement, said point marks the POINT OF BEGINNING;

THENCE South 08 degrees, 12 minutes, 45 seconds East for a distance of 2,401.30 feet along the Eastern margin of the TVA Eastern Line Easement to a point located on the Southeastern boundary line of the ENCLOSURE "A" property;

THENCE South 28 degrees, 12 minutes, 27 seconds West for a distance of 0.90 feet along the Southeastern boundary line of the ENCLOSURE "A" property to a point;

THENCE South 28 degrees, 17 minutes, 40 seconds West for a distance of 92.48 feet along the Southeastern boundary line of the ENCLOSURE "A" property to a point;

THENCE South 28 degrees, 13 minutes, 41 seconds West for a distance of 158.75 feet along the Southeastern boundary line of the ENCLOSURE "A" property to a point;

THENCE South 28 degrees, 14 minutes, 55 seconds West for a distance of 84.39 feet along the Southeastern boundary line of the ENCLOSURE "A" property to a point located on the Western margin of the TVA Eastern Line Easement;

THENCE North 08 degrees, 12 minutes, 45 seconds West for a distance of 2,674.66 feet along the Western margin of the TVA Eastern Line Easement to a point located on the Southern boundary line of Tract 11, U.T.C. Parcel;

THENCE North 82 degrees, 34 minutes, 00 seconds East for a distance of 200.02 feet along the Southern boundary line of Tract 11, U.T.C. Parcel to the POINT OF BEGINNING.

Said portion of the TVA Eastern Line Easement herein described contains 11.653 acres, more or less.

---

**EASTSIDE UTILITY DISTRICT  
WATERLINE EASEMENT**

Subject to an Eastside Utility District Waterline Easement 30.00 feet in width being more particularly described as follows:

BEGINNING at a point in the Eastern boundary line of the Volunteer Army Ammunition Plant (VAAP) Area "A", said point having coordinates of North=272,201.04 and East=2,230,268.31, coordinates based on NAD 83, Tennessee State Grid Coordinate System and referenced to the Chattanooga-Hamilton County Monument Network (CHAM) System. All bearings and distances described herein are based on said system.

THENCE South 39 degrees, 56 minutes, 45 seconds East for a distance of 83.10 feet to a point;

THENCE South 32 degrees, 55 minutes, 51 seconds East for a distance of 126.95 feet to a point;

THENCE South 13 degrees, 14 minutes, 36 seconds East for a distance of 59.69 feet to a point;  
THENCE South 07 degrees, 57 minutes, 20 seconds West for a distance of 122.71 feet to a point;  
THENCE South 14 degrees, 35 minutes, 06 seconds West for a distance of 112.63 feet to a point;  
THENCE South 21 degrees, 05 minutes, 26 seconds West for a distance of 141.29 feet to a point;  
THENCE South 05 degrees, 18 minutes, 44 seconds West for a distance of 50.79 feet to a point;  
THENCE South 03 degrees, 49 minutes, 16 seconds East for a distance of 375.70 feet to a point;  
THENCE South 04 degrees, 51 minutes, 03 seconds East for a distance of 160.92 feet to a point;  
THENCE South 02 degrees, 59 minutes, 42 seconds East for a distance of 84.74 feet to a point;  
THENCE South 06 degrees, 36 minutes, 44 seconds East for a distance of 99.02 feet to a point;  
THENCE South 09 degrees, 02 minutes, 46 seconds East for a distance of 73.67 feet to a point;  
THENCE South 63 degrees, 55 minutes, 53 seconds East for a distance of 57.33 feet to a point;  
THENCE South 38 degrees, 43 minutes, 12 seconds East for a distance of 36.85 feet to a point;  
THENCE South 46 degrees, 41 minutes, 34 seconds East for a distance of 100.80 feet to a point;  
THENCE South 60 degrees, 01 minutes, 38 seconds East for a distance of 167.18 feet to a point;  
THENCE South 50 degrees, 21 minutes, 44 seconds East for a distance of 224.99 feet to a point;  
THENCE South 47 degrees, 41 minutes, 21 seconds East for a distance of 376.42 feet to a point;  
THENCE South 49 degrees, 25 minutes, 58 seconds East for a distance of 228.47 feet to a point;  
THENCE South 47 degrees, 26 minutes, 48 seconds East for a distance of 248.68 feet to the POINT OF  
ENDING, said point of ending located North 78 degrees, 28 minutes, 58 seconds East for a distance of  
186.98 feet from an existing concrete monument stamped VO-195, said concrete monument is located on  
the Southeast boundary line of the Volunteer Army Ammunition Plant (VAAP) property.

Said Eastside Utility District Waterline Easement herein described contains 2.019 acres, more or less.

---

#### ELECTRIC POWER BOARD EASEMENT

Subject to a portion of an Electric Power Board Easement 75.00 feet in width, being more particularly described as follows:

BEGINNING at the Southwest corner of the ENCLOSURE "A" property;

THENCE North 00 degrees, 58 minutes, 21 seconds East for a distance of 132.67 feet along the Southwestern boundary line of the ENCLOSURE "A" property to a point located on the Northern margin of the Electric Power Board Easement;

THENCE North 80 degrees, 33 minutes, 01 seconds East for a distance of 15.41 feet along the Northern margin of the Electric Power Board Easement to a point located on the Eastern margin of the Electric Power Board Easement;

THENCE South 13 degrees, 49 minutes, 23 seconds East for a distance of 113.39 feet along the Eastern margin of the Electric Power Board Easement to a point located on the Southern boundary line of the ENCLOSURE "A" property;

THENCE South 60 degrees, 37 minutes, 15 seconds West for a distance of 51.12 feet along the Southern boundary line of the ENCLOSURE "A" property to the POINT OF BEGINNING.

Said portion of the Electric Power Board Easement herein described contains 3,798 square feet, more or less.

---

### COLONIAL PIPELINE EASEMENT

Subject to a Colonial Pipeline Easement, 30.00 feet in width, being more particularly described as follows.

COMMENCING at a point marking the Southwest corner of the property described as ENCLOSURE "A";

THENCE North 00 degrees, 58 minutes, 21 seconds East for a distance of 907.22 feet along the Southwestern boundary of the ENCLOSURE "A" property to a point.

THENCE North 24 degrees, 48 minutes, 16 seconds East for a distance of 249.57 feet along the Southwestern boundary of the ENCLOSURE "A" property to a point located on the Southern margin of the Colonial Pipe Easement, said point marks the POINT OF BEGINNING,

THENCE North 24 degrees, 48 minutes, 16 seconds East for a distance of 57.91 feet along the Southwestern boundary of the ENCLOSURE "A" property to a point located on the Northern margin of the Colonial Pipe Easement;

THENCE North 56 degrees, 00 minutes, 27 seconds East for a distance of 3,381.00 feet along the Northern margin of the Colonial Pipe Easement to a point.

THENCE North 57 degrees, 53 minutes, 26 seconds East for a distance of 4,411.86 feet along the Northern margin of the Colonial Pipe Easement to a point;

THENCE North 70 degrees, 11 minutes, 21 seconds East for a distance of 5,007.70 feet along the Northern margin of the Colonial Pipe Easement to a point located on the Eastern boundary line of the ENCLOSURE "A" property;

THENCE South 28 degrees, 14 minutes, 55 seconds West for a distance of 21.60 feet along the Eastern boundary line of the ENCLOSURE "A" property to a point;

THENCE South 28 degrees, 07 minutes, 36 seconds West for a distance of 23.23 feet along the Eastern boundary line of the ENCLOSURE "A" property to a point located on the Southern margin of the Colonial Pipe Easement;

THENCE South 70 degrees, 11 minutes, 21 seconds West for a distance of 4,971.15 feet along the Southern margin of the Colonial Pipe Easement to a point.

THENCE South 57 degrees, 53 minutes, 26 seconds West for a distance of 4,408.14 feet along the Southern margin of the Colonial Pipe Easement to a point;

THENCE South 58 degrees, 00 minutes, 27 seconds West for a distance of 3,430.03 feet along the Southern margin of the Colonial Pipe Easement to the POINT OF BEGINNING.

Said Colonial Pipeline Easement herein described contains 8.819 acres, more or less.

FINDING OF SUITABILITY TO TRANSFER

Approximately 2800 Acres for Conveyance to the City of Chattanooga/Hamilton County  
and the University of Tennessee at Chattanooga

VOLUNTEER ARMY AMMUNITION PLANT

CHATTANOOGA, TENNESSEE

9 September 2003

Environmental Management Office  
Volunteer Army Ammunition Plant  
Chattanooga, Tennessee

Buildings/Features for the 100-Acre Parcel G

- There are no buildings/facilities currently located on this parcel.

Buildings/Features for the 200-Acre Parcel F

- There are no buildings/facilities currently located on this parcel.

**3. ENVIRONMENTAL CONDITION OF THE PROPERTY**

A determination of the environmental condition of the three parcels referenced above has been made based on the Final Confirmatory Sampling (CS) Report for the Eastern Magazine Area and Surrounding Property (Shaw Environmental and Infrastructure, Inc., 2003) and the final Corrective Measures Study (CMS) Report for the New Landfill Burning Ground Area (Tetra Tech/MACTEC, 2003). Sections of the CS Report also contain preliminary findings of the Environmental Baseline Survey (EBS) as they pertain to the Eastern Magazine Area and surrounding property (Plexus Scientific, 2003). The information provided in the reports is a result of a complete search of agency files; an assessment of adjacent facilities; environmental sites; buildings in and around the parcels; compilation of previous visual site inspections and historical interviews documenting site use; an investigation specific to the determination of the nature and extent of groundwater contamination, if any, under the parcels that included sampling of and compilation of historical data from existing groundwater monitoring wells, as well as new data from 11 new bedrock wells in the vicinity of the 2500-acre parcel. Soil along the drainage ditches outside the magazines and in various sites at the New Landfill/ Burning Ground and Parcel G were also sampled. A removal action was completed previously (1999) at the burning ground and is documented in the CMS Report.

All environmental concerns addressed in the final CS Report for the Eastern Magazine Area and surrounding area have been resolved by additional reviews, interviews, and by interim actions to remove contaminated sources (TNT and lead products from burning cage).

Areas of Interest Within the Approximately 2500 Acres

Grey Pond – Approximately 2.5 Acres: Identified as barren area on 1999 aerial photograph. EPA and TDEC concurred with no further action as recommended in Draft RCRA Facility Assessment Report Redwater Ash Handling and Miscellaneous Areas of Concern (July 2002).

Commander's Garden – Approximately 2 Acres: Identified as barren area with surface disturbance on 1999 photograph. EPA and TDEC concurred with no further action as recommended in Final RCRA Facility Report Areas of Concern 9, 10, 10b and Salvage Yard (June 2002).

Sanitary Landfill – Approximately 3.2 Acres: This Sanitary Landfill is not required to be addressed under the EPA RCRA Order or the State Superfund (CERCLA) program because of its sanitary nature. The landfill was constructed in 1969 and 1970 for disposal of onsite office and kitchen waste material as well as noncontaminated/nonhazardous industrial waste material. In 1991 the facility was designated as a Class II landfill by Tennessee Department of Environment and Conservation. Landfill was closed with a cap in 1996 and a certificate of closure submitted to TDEC director of the Division of Solid Waste Management. Final inspection and acceptance occurred in 1996. The

maintenance, inspection and monitoring per post-closure plan (Consolidated Technologies, Inc., 1994) is being performed by the Army.

**Redwater Ash Landfill – Approximately 2.5 Acres:** Suspected area of high PAH and lead were sampled. Recommendation for no further action in the Final Confirmatory Sampling (CS) Report for the Eastern Magazine Area and surrounding property (Shaw E&I, 2003) was concurred with by EPA and TDEC.

**Parcel F – Approximately 200 Acres:** The parcel is located in a wooded buffer area in the eastern section of the Eastern Magazine Area. There was no previous production or burial occurred in this area. The preliminary finding of the EBS and CS Report did not identify any environmental concerns and therefore no action is required in this parcel.

**Parcel G – Approximately 100 Acres:** The parcel is located in a wooded buffer area in the northern section of VOAAP. There was no previous production or burial occurred in this area. The preliminary finding of the EBS and CS Report did not identify any environmental concerns and therefore no action is required in this parcel.

### **3.1 Environmental Condition of Property Categories**

The Department of Defense (DOD) Environmental Condition of Property (ECP) category for the Property is as follows: (See Paragraph 2 for list of buildings/facilities associated with the Property.)

**ECP Category 4: 2500-acre parcel – ECP Category 4:** Area where release, disposal, and/or migration of hazardous material have occurred and all removal or remedial action to protect human health and the environment have been taken.

**ECP Category 1: 100-acre parcel – ECP Category 1:** Areas where no release, disposal of hazardous substances or petroleum products has occurred. (Including no migration of these substances from adjacent areas.)

**ECP Category 1: 200-acre parcel - ECP Category 1:** Areas where no release, disposal of hazardous substances or petroleum products has occurred. (Including no migration of these substances from adjacent areas.)

A description of the Property and a definition of the DOD ECP Categories are provided at Enclosure 2.

### **3.2 Storage, Release, or Disposal of Hazardous Substances**

Hazardous substances were stored for one year or more in excess of the 40 CFR Part 373 reportable quantities on the 2500-acre Property proposed for transfer. All hazardous substance storage operations have been terminated on the property. Removal actions were completed in 1999 and 2003 and are documented in final CMS Report. No further action is required for these releases. Notification is reported in Table 2 – Notification of Hazardous Substance Storage, Release or Disposal (Enclosure 3).

### **3.3 Petroleum and Petroleum Products**

### **3.3.1 Storage, Release, or Disposal of Petroleum Products (not in underground or aboveground storage tanks)**

There is no evidence that any petroleum or petroleum products in excess of 55 gallons at one time were stored, released or disposed of on the Property as a result of non-UST/AST petroleum activities. Accordingly, there is no need for any notification of non-UST/AST petroleum product storage, release, or disposal.

### **3.3.2 Current Underground and Aboveground Storage Tanks (UST/AST)**

There is no evidence that petroleum products were stored in underground or aboveground storage tanks on the Property. Accordingly, there is no need for any notification of any UST/AST petroleum product storage, release, or disposal.

### **3.4 Polychlorinated Biphenyls (PCB) Equipment**

There are no PCB containing transformers or other PCB containing equipment remaining on the Property and no evidence of unremediated releases from PCB equipment.

### **3.5 Asbestos**

There are no remaining buildings or structures with asbestos-containing materials on the Property. Asbestos on piping in Building 767 was removed in 2002 in accordance with regulatory requirements.

### **3.6 Lead-Based Paint (LBP)**

Based on the age of the buildings (constructed prior to 1978), the following buildings located on the Property are presumed to contain lead-based paint: Buildings (Magazines) 101 through 200; Building 767, Burning Ground Office; and Building 770, Steam Jenny Building. The deed will include the lead-based paint warning and covenant provided in Environmental Protection Provisions (Enclosure 6). The samples collected outside the magazines did not detect lead.

### **3.7 Radiological Materials**

There is no evidence that the radioactive material or sources were used or stored on the Property.

### **3.8 Radon**

A radon survey was conducted at VOAAP from October 1990 to October 1991. The survey was accomplished under U.S. Army protocol as prescribed by the U.S. Army Environmental Hygiene Agency (USAEHA). No buildings on the Property were part of the USAEHA radon survey.

### **3.9 Unexploded Ordnance**

Based on a review of existing records and available information, no land on the 2800-acre parcel proposed for transfer is known to contain unexploded ordnance.

### **3.10 Groundwater**

The overburden and upper bedrock water-bearing zones characterized by the new and existing wells in the vicinity of the three parcels do not constitute an "aquifer" and are not adequate as a drinking water supply in Tennessee due to the critically low yield. Yields are considerably lower than the minimum requirements of the State of Tennessee for classification as a drinking water supply, which stipulates that yields shall be at a minimum of 1.0 gallon per minute and sustainable for a 24 hour period (TDEC, Division of Water Pollution Control, Chapter 1200-4-3).

There is a potential for contaminated groundwater to migrate from adjacent Army property to the parcels; therefore, ground water use restrictions will be placed on the property consistent with other property transfers at Volunteer. The deed will include a groundwater restriction provided in the Environmental Protection Provisions (Enclosure 6).

#### **4. ADJACENT HAZARDOUS CONDITIONS**

There are no buildings/facilities adjacent to the 2500-acre parcel. The New Acid Facility with all of its buildings and facilities are located within approximately 150 yards of the 100-acre parcel (G). Drainage features located on the north and east side of the New Acid Facility drains north onto the 100-acre parcel (Parcel G). These facilities should have no adverse effect on the transfer of the subject property. Groundwater issues on adjacent properties are discussed in Section 3.10.

#### **5. REMEDIATION**

There is an EPA, Region IV, RCRA Administrative Order, effective December 2001, applicable to the entire VOAAP site including the properties being transferred. Additionally, TDEC has a Defense State Memorandum of Agreement to provide oversight activities and ensure remediation is conducted according to State Superfund regulations. All necessary remediation activities on the properties required by the Order and applicable State regulations are complete.

#### **6. REGULATORY/PUBLIC COORDINATION**

The Environmental Protection Agency, Region IV and Tennessee Department of Environmental and Conservation were provided a copy of the Draft FOST on July 10, 2003. The public was notified of the initiation of this FOST through a Public Notice for Comment that was placed in three local newspapers 18 and 21 July 2003 for three days. There was a public comment period that began on 21 July 2003 and ended at the close of business on 19 August 2003. All comments received are incorporated in Enclosure 4. The Army's response to comments received for this FOST are incorporated in Enclosure 5.

#### **7. NATIONAL ENVIRONMENTAL POLICY ACT (NEPA) COMPLIANCE AND CONSISTENCY WITH LOCAL REUSE PLAN**

The environmental impacts associated with proposed transfer of the property have been analyzed in accordance with the NEPA. The results of this analysis are documented in the Final Proposed

Disposal, Environmental Impact Statement (FEIS) prepared by the General Services Administration (GSA) dated July 1999, and the EIS Record of Decision (ROD) dated 30 August 1999. Any encumbrances or conditions identified in such analysis as necessary to protect human health or the environment have been incorporated into the FOST. In addition, the proposed transfer is consistent with the intended reuse of the property as set forth in the Hamilton County/City of Chattanooga Reuse Plan (Preferred Alternatives) May 19, 2000.

### 8. ENVIRONMENTAL PROTECTION PROVISIONS

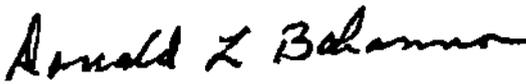

On the basis of the above results from the EBS and other environmental studies and in consideration of the intended use of the property, certain terms and conditions are required for the proposed transfer. These terms and conditions are set forth in the attached Environmental Protection Provisions and will be included in the deed (Enclosure 6).

### 9. FINDINGS OF SUITABILITY TO TRANSFER

Based on the above information, I conclude that Department of Defense requirements to reach a finding of suitability to transfer the Property have been met, subject to the terms and conditions set forth in the attached Environmental Protection Provisions (Enclosure 6). All removal or remedial actions necessary to protect human health and the environment have been taken and the property is transferable under CERCLA Section 120(h)(3). In addition to the Environmental Protection Provisions, the deed for this transaction will also contain:

- The covenant under CERCLA § 120(h)(3)(A)(ii)(I) warranting that all remedial action under CERCLA necessary to protect human health and the environment with respect to hazardous substance remaining on the Property has been taken before the date of transfer.
- The covenant under CERCLA § 120(h)(3)(A)(ii)(II) warranting that any remedial action under CERCLA found to be necessary after the date of transfer with respect to such hazardous substances remaining on the Property shall be conducted by the United States.
- The clause as required by CERCLA § 120(h)(3)(A)(iii) granting the United States access to the Property in any case in which remedial action or corrective action is found to be necessary after the date of transfer.

As required under the CERCLA Section (120(h) and DOD FOST Guidance, notification of hazardous substance activities and petroleum product activities shall be provided in the deed. See Table 2, Notification of Hazardous Substance Storage, Release, or Disposal (Enclosure 3).

Enclosure 1

**SITE MAP OF PROPERTY**

Enclosure 2

TABLE 1 - DESCRIPTION OF PROPERTY

Building Number and Property Description	EBS Parcel Designation	Condition Category	Remedial Actions
Buildings 101 thru 200, Developed and Wooded Tract of Land	2500 Acres for the City of Chattanooga/Hamilton County	ECP CAT 4	Interim removal action at burning cage. RCRA closure of soils at burning ground.
Wooded Tract of Land (Safety Buffer Area)	100 Acres (Safety buffer area along northern boundary of VOAAP) for Hamilton County	ECP Cat 1	None.
Wooded Tract of Land (Safety Buffer Area)	200 Acres (Safety buffer area along eastern boundary of VOAAP) for the University of Tennessee at Chattanooga	ECP Cat 1	None.

**Category 1:** Areas where no release or disposal of hazardous substances or petroleum products has occurred. (Including no migration of these substances from adjacent areas.)

**Category 4:** Area where release, disposal, and/or migration of hazardous substance have occurred, and all removal or remedial actions to protect human health and the environment have been taken.

## Enclosure 3

**TABLE 2 – NOTIFICATION OF HAZARDOUS SUBSTANCE STORAGE,  
RELEASE, OR DISPOSAL**

Building Number and Property Description	Name of Hazardous Materials	Date of Storage, Release, or Disposal	Remedial Actions
Magazines 101 thru 200	DOD 1.1 High Explosive [Primarily Trinitrotoluene (TNT)]  Chemical Abstracts Service Registry No. (CASRN) 118-96-7  Chemical Abstracts Service Registry No. (CASRN) 7790-98-9 (Ammonium Perchlorate)	Storage 1942-1945: 205,903 Tons 1951-1957: 71,092 Tons 1965-1977: 460,610 Tons 1987-1999: Missiles	Removal of all TNT material from all magazines. 1988) Missiles (1999)
Burning Ground	DOD 1.1 High Explosive [Primarily Trinitrotoluene (TNT)]  Chemical Abstracts Service Registry No. (CASRN) 118-96-7	Disposal 1999 Unknown Quantity	RCRA closure of burning ground, 1999. 1,030 tons of contaminated soils removed.
Burning Cage Located on Burning Ground.	DOD 1.1 High Explosive [Primarily Trinitrotoluene (TNT)]  Chemical abstracts Service Registry No.(CASRN) 118-96-7  Lead – Chemical Abstracts Service Registry No. 7439-92-1	Disposal 2003 Unknown Quantity	Interim corrective action, 2003. Approximately 30 tons of contaminated soils removed.

**NOTE:** The information contained in this notice is required under the authority of regulations promulgated under Section 120(h) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or Superfund) 42 U.S.C. Section 9620(h).

ENCLOSURE C

ENVIRONMENTAL RESTRICTIONS

The Grantor has determined that the portion of the Volunteer Army Ammunition Plant described in Exhibit A is environmentally suitable for transfer to the Grantees and has informed the Grantees of the environmental condition of the property hereby conveyed ("Property"), all as more fully set forth in the Finding of Suitability To Transfer ("FOST"), Exhibit B, which is attached hereto, made a part hereof and consists of 12 pages of text.

(A) NOTICE Regarding Hazardous Substance Activity. Pursuant to 40 CFR 373.2 and Section 120(h) (3) (A) (i) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended (CERCLA) (42 U.S.C. §9620(h) (3) (A)(i)), and based upon a complete search of agency files, the United States gives notice that hazardous substances were known to have been stored for one year or more on the Property.

(B) CERCLA Covenant. Grantor warrants that all remedial action necessary to protect human health and the environment has been taken before the date of this conveyance. Grantor warrants that it shall take any additional response action found to be necessary after the date of this conveyance regarding hazardous substances located on the Property on the date of this conveyance.

(1) This covenant shall not apply:

(a) in any case in which Grantees, their successor(s) or assign(s), or any successor in interest to the Property or part thereof is a Potentially Responsible Party (PRP) with respect to the Property immediately prior to the date of this conveyance; or

(b) to the extent but only to the extent that such additional response action or part thereof found to be necessary is the result of an act or failure to act of the Grantees, their successor(s) or assign(s), or any party in possession after the date of this conveyance that either:

(i) results in a release or threatened release of a hazardous substance that was not located on the Property on the date of this conveyance; or

(ii) causes or exacerbates the release or threatened release of a hazardous substance the existence and location of which was known and identified to the applicable regulatory authority as of the date of this conveyance.

(2) In the event Grantees, their successor(s) or assign(s), seek to have Grantor conduct or pay for any additional response action, and, as a condition precedent to Grantor incurring any additional cleanup obligation or related expenses, the Grantees, their successor(s) or assign(s), shall provide Grantor at least 45 days written notice of such a claim and provide credible evidence that:

- (a) the associated contamination existed prior to the date of this conveyance; and
- (b) the need to conduct any additional response action or part thereof was not the result of any act or failure to act by the Grantees, their successor(s) or assign(s), or any party in possession.

(C) ACCESS. Grantor reserves a right of access to all portions of the Property for environmental investigation, remediation or other corrective action. This reservation includes the right of access to and use of available utilities at reasonable cost to Grantor. These rights shall be exercisable in any case in which a remedial action, response action or corrective action is found to be necessary after the date of this conveyance, or in which access is necessary to carry out a remedial action, response action, or corrective action on adjoining property. Pursuant to this reservation, the United States of America, and its respective officers, agents, employees, contractors and subcontractors shall have the right (upon reasonable advance written notice to the record title owner) to enter upon the Property and conduct investigations and surveys, to include drilling, test-pitting, borings, data and records compilation and other activities related to environmental investigation, and to carry out remedial or removal actions as required or necessary, including but not limited to the installation and operation of monitoring wells, pumping wells, and treatment facilities. Any such entry, including such activities, responses or remedial actions, shall be coordinated with record title owner and shall be performed in a manner that minimizes interruption with activities of authorized occupants.

#### RESTRICTIVE COVENANTS:

Further, by agreement between the Grantor and Grantees, and consistent with current land use planning, the intended use of the property is for park and recreational use and purposes. Therefore, the Property is conveyed subject to the following restrictive covenants which shall run with the land and shall be binding on all parties having any right, title, or interest in the Property or any part thereof, their heirs, successors-in-title, and assigns, and shall inure to the benefit of each owner thereof, the general public, and the State of Tennessee, the City of Chattanooga, Tennessee and Hamilton County, Tennessee and the respective successors and assigns of such parties. Further, nothing herein in this section shall be interpreted as imposing an obligation or requirement on the Grantor to monitor Grantees or their successors or assignees, use of the property to ensure compliance with the non-residential use and groundwater restrictions herein. If the Grantees, their successors, or assignees wish to change the land use of the Property, then the Grantor and Grantees agree that all costs associated with the change in land use will be borne by the Grantees, their successors and assigns and not the Grantor.

Prior to any part of the Property being used for residential use, such as and including, a residence, domicile, daycare, school, or church, etc., the Grantees, their successors and/or assigns must notify the TDEC and the Army and must demonstrate to the satisfaction of TDEC that any such proposed use will not pose a danger to public health, safety or the environment. Any approval granted by TDEC for the restricted uses shall be in writing, must contain a

reference to this instrument and shall be maintained in TDEC's files and will be effective upon the Grantees' filing such approval at Grantees' expense, at the Register's Office for Hamilton County, Tennessee. The restrictions and conditions benefit the public in general and the area surrounding the property, including lands retained by the Grantor, and are enforceable by the State of Tennessee. The Grantee covenants for itself, its successors and assigns that it shall include and otherwise make legally binding these restrictions in all subsequent lease, transfer or conveyance documents relating to the property.

**Restrictions and Conditions:** In order to ensure current groundwater quality conditions are maintained, the Grantee covenants for itself, its successors, and assigns not to access or use groundwater underlying the Property. For the purpose of this restriction, "groundwater" shall have the same meaning as in section 101(12) of CERCLA. The Grantee, for itself, its successors and assigns covenants that it will not undertake nor allow any activity or use of the property that would violate the restrictions contained herein. These restrictions and covenants are binding on the Grantee, its successors and assigns; shall run with the land; and are enforceable by the TDEC, or successor agencies. Any approval granted by TDEC to allow a restricted use or to amend or lift these restrictions and covenants shall be in writing, must contain a reference to this instrument, and shall be filed with the Hamilton County Register of Deeds. Until such time as all Army remediation on Volunteer is complete, to include long-term monitoring, the Army will receive written notice of any such requests to allow a restricted use or amend or lift these restrictions and covenants and the Army shall be given reasonable opportunity to review and provide comment to the regulatory agencies on such requests.

The Grantor reserves for the United States Army and the TDEC a right of access to all portions of the Property for environmental investigation, remediation or other corrective action. This reservation includes the right of access to and uses of, to the extent permitted by law, available utilities at reasonable cost to the Grantor or its successors and assigns. Pursuant to this reservation, the United States Army, the TDEC and their officers, agents, employees, contractors and subcontractors shall have the right (upon reasonable notice to the owner and any authorized occupant of the Property) to enter upon the Property and conduct investigations and surveys, to include drillings, test-pitting, borings, data and record compilation, and other activities related to environmental investigation and to carry out remedial or removal actions as required or necessary under applicable authorities, including but not limited to monitoring wells, pumping wells, and treatment. Any such entry, including such activities, responses or remedial actions, shall be coordinated with the Grantees or their successors and assigns and shall be performed in a manner which minimizes interruption with Grantees' activities on the Property. Nothing herein shall be construed as limiting TDEC's right of entry, pursuant to any applicable statute, regulation or permit.

The Grantees or their successors and assigns shall not hinder or prevent the United States Army from properly constructing, upgrading, operating, maintaining and monitoring any groundwater treatment facilities or groundwater monitoring network or engage in any activity that will disrupt or hinder required environmental investigation, response action, including remediation, or corrective action or oversight activities. Any such entry, including such activities, responses or remedial actions, shall be coordinated with the Grantees or their successors and assigns and shall

ENCLOSURE D

PRESERVATION COVENANT FOR THE  
CONVEYANCE OF VOLUNTEER ARMY AMMUNITION PLANT  
HISTORICAL PROPERTIES

The Grantee covenants for itself, its successors, and assigns and every successor in interest to the property hereby conveyed, or any part thereof, that the real property above described is hereby conveyed subject to the conditions, restrictions, and limitations hereinafter set forth which are covenants running with the land; that the Grantee, its successors, and assigns, covenants and agrees, that in the event that the property is sold or otherwise disposed of, these covenants and restrictions shall be inserted in the instruments of conveyance.

Site 40HA484 and Site 40HA499 at the Volunteer Army Ammunition Plant have been identified as subject to the protection provisions under the National Historic Preservation Act (NHPA) (16 U.S.C. 470). Any ground disturbing activity with the potential to directly or indirectly impact cultural deposits shall be restricted. No disturbance of the ground surface or any other thing shall be undertaken or permitted to be undertaken on these properties that would affect their integrity without the express prior written permission by the Tennessee State Historic Preservation Officer (SHPO), Tennessee Historical Commission, Department of Environment and Conservation, 2941 Lebanon Road, Nashville, Tennessee 37243-0442.

1. The Grantee shall provide boundary identification, with appropriate buffer areas and barriers, to protect the sites from visitors, potential disturbance or any accidental disturbance.
2. Each site will be identified on all project plans for the park as "sensitive areas."
3. No activity will be allowed which by disturbing, altering or otherwise affecting the existing surface or subsurface of the historic sites would be detrimental to the appropriate preservation of the archeological resources therein.
4. The Grantee shall monitor the historic sites and make every reasonable effort to prevent any person from vandalizing or otherwise disturbing these historic properties. The Grantee will follow any recommendation by the SHPO to protect these historic properties. Any such vandalism shall be promptly reported to the SHPO.
5. Representatives of the SHPO shall have the right to inspect the premises from time to time, upon reasonable notice, to determine whether the Grantee is in compliance with the terms of the conveyance documents.
6. These restrictions shall be binding on the Parties hereto, their successors, and assignees in perpetuity; the SHPO may, for good cause, modify or cancel any or all of the foregoing restrictions upon written application of the Grantee, its successors or assignees.

7. The acceptance of the delivery of a Deed conveying title to the property shall constitute conclusive evidence of the agreement of the Grantee to be bound by the conditions, restrictions, and limitations, and to perform the obligations herein set forth.
8. In the event of violation of the above restrictions, the United States of America (USA) or the SHPO may institute a suit to enjoin such violation or for damages by reason of any breach thereof.
9. The failure of the SHPO to exercise any right or remedy granted under this instrument shall not have the effect of waiving or limiting the exercise of any right or remedy or the use of such right or remedy at any other time. This covenant shall be a binding servitude upon the real property and shall be deemed to run with the land. Execution of this covenant shall constitute conclusive evidence that the Grantee agrees to be bound by the foregoing conditions and restrictions and to perform to obligations herein set forth.
10. If proposed protection measures or potential impact of a proposed activity are in question, the SHPO should be contacted for comment. Should the SHPO require, as a condition of granting such permission, the Grantee shall conduct archeological data recovery operations or other activities designed to mitigate the adverse effect of the proposed activity on an historic property that is eligible to be listed on the National Register. The Grantee shall, at its own expense, conduct such an activity in accordance with the Secretary of Interior's Standards and Guidelines for Archeological Documentation and such standards and guidelines as the SHPO may specify. The Grantee will be responsible for the curation activities and associated fees.
11. If the Grantee, its successors or assigns and the SHPO are unable to agree on the proposed protection measures for these sites, the Grantee, its successors or assigns, shall forward all documents relevant to the dispute to the Advisory Council on Historic Preservation (ACHP). The Grantee, its successors or assigns, SHPO, and ACHP shall reach agreement regarding the proposed measures. If such an agreement cannot be reached, the ACHP shall forward all relevant project materials with comments to the General Services Administration (GSA). GSA will consider such comments, and if necessary take action in accordance with the terms and conditions of these covenants.

The Grantee is encouraged to preserve in place and apply these protective provisions to any additional Civil War earthworks sites identified on the property.

**NETR- Real Estate Research & Information** hereby submits the following ASTM historical chain-of-title to the land described below, subject to the leases/miscellaneous shown in Section 2. Title to the estate or interest covered by this report appears to be vested in:

**CITY OF CHATTANOOGA AND HAMILTON COUNTY, TENNESSEE**

The following is the current property legal description:

Being that parcel or tract of land, situated and lying in a portion of the Volunteer Army Ammunition Plant, City of Chattanooga, Hamilton County, State of Tennessee

Assessor's Parcel No: Map 130, Parcel 001

## **1. HISTORICAL CHAIN OF TITLE**

### 1. WARRANTY DEED:

RECORDED: 08-21-1937  
GRANTOR: Joe A. Chambers  
GRANTEE: Clara Miller  
INSTRUMENT: Bk X29, Pg 563

### 2. WARRANTY DEED:

RECORDED: 10-23-1941  
GRANTOR: Clara Miller  
GRANTEE: United States of America  
INSTRUMENT: Bk 827, Pg 29

### 3. QUIT CLAIM DEED:

RECORDED: 03-29-2005  
GRANTOR: United States of America  
GRANTEE: City of Chattanooga and Hamilton County, Tennessee  
INSTRUMENT: Bk 7476, Pg 1

## **2. LEASES AND MISCELLANEOUS**

The following Notification, Restrictions and CERCLA Covenants are filed of record:

1. The property contains a sanitary landfill which has been closed. The Department of the Army is responsible for post closure activities at the landfill, including maintenance, inspection, and monitoring the post-closure plan. It is agreed that the Department of the Army will have continued access to the landfill to conduct post-closure activities.
2. Property contains numerous Corbetta-type storage magazines which were used for storing packaged boxes of TNT
3. Notification of the storage, release and disposal of hazardous substances on the property. Restrictions and covenants restrict the property from the use of the property for residential purposes.

### **3. LIMITATION**

This report was prepared for the use of Environmental Data Resources, Inc., and FMSM Engineers, Inc., exclusively. This report is neither a guarantee of title, a commitment to insure, or a policy of title insurance. NETR- Real Estate Research & Information does not guarantee nor include any warranty of any kind whether expressed or implied, about the validity of all information included in this report since this information is retrieved as it is recorded from the various agencies that make it available. The total liability is limited to the fee paid for this report.

## **EXECUTIVE SUMMARY**

The U.S. Army Reserves proposes to acquire approximately 15-acres, to include three buildings and associated parking areas, from the Army Material Command (AMC). The site was obtained by AMC in 1941 for a Volunteer Army Ammunition Plant (VAAP). The VAAP is currently excess to the needs of the AMC. The Army Reserve responded in 1998 to the Department of Defense (DOD) screening request for reassignment of Buildings 228, 229, 756, and the associated underlying land.

Records searches and site investigations have revealed no evidence of environmental liabilities such as a release or potential of a release of petroleum or hazardous substances on site or on nearby properties. Sufficient investigations and studies have been conducted to identify all potential environmental hazards. Two Underground Storage Tanks (USTs) were identified in the investigation. One 10,000 gallons gasoline tank and one 500 gallon used oil tank was identified. Both tanks currently meet or exceed December 22, 1998 standards. In addition to the existing tanks, three USTs were removed and received clean/closed reports in September 1995. Site investigation revealed no indications of threatened or endangered species or cultural resources on these sites.

Since this property will be transferred to another Federal agency for use as administration, maintenance, and storage. There will be no change in land use for this site. The proposed land use is also compatible with land use in the surrounding area, since the area is zoned for light industrial activity.

## **1.0 INTRODUCTION**

The proposed real estate transaction is a transfer of approximately 15-acres of property including three buildings and associated parking areas from the Army Material Command (AMC) to the Army Reserve. The property would be utilized for administrative and maintenance operations. The property was originally utilized as a Volunteer Army Ammunition Plant. The tract is located at 6511 Bonny Oaks Drive, Hamilton County, Tennessee. The primary author of this report is Mr. Steven Francis, DTC, for the 81<sup>st</sup> Regional Support Command. Site inspections of the property were conducted on April 2, 1998 by CPT Daniel George and on January 26, 1999 by CPT Scott Vick.

The purpose of this Environmental Baseline Study (EBS) is to: 1) Identify the presence, release, or threat of release, of any hazardous substance or petroleum products affecting the Property; 2) gather preliminary information regarding the level of compliance with current environmental standards, laws, regulations, and permits (if any) with respect to the property and special resources; 3) Establish a baseline of environmental conditions for historic and comparative purposes; 4) Identify whether any hazardous substance has been stored, released or disposed of on the Property; 5) Reduce uncertainty regarding recognized environmental conditions; and 6) Identify the need for additional testing to evaluate the scope, locations, source, and nature of any releases or threat of releases of hazardous substances affecting the property.

This EBS is in accordance with Army Regulation (AR) 200-1, paragraph 15-6, for proposed real property transactions and follows the requirements detailed in the draft Department of the Army (DA) PAM 200-1, 16 July 1997.

## **2.0 SITE LOCATION AND PHYSICAL DESCRIPTION**

The 15-acre property is located at 6511 Bonny Oaks Drive, approximately 7.5 miles northeast of Chattanooga, Hamilton County, Tennessee. The site is located on the SE ¼ of the SE ¼ of the SE ¼ of Section 26, Township 5, Range 3, West of the basis of the Ocoee. The AMC acquired the property in 1941 through a combination of purchases and condemnation. A list of the previous owners can be seen in the Historical Chain of Custody in Appendix A. The Army has owned this property continuously since the acquisition in 1941 to present and has utilized it as a VAAP. The site point of contact is Mr. Richard Twitchel, who can be contacted at (423) 855-7105.

The tract is located within the city limits of Chattanooga. The zoning is categorized as Industrial/Commercial

## **3.0 CURRENT AREA CHARACTERISTICS**

### **3.1 Adjacent Properties**

Table 1 lists the properties which are located adjacent to the subject property. Surrounding properties are primarily made up of open fields and office buildings.

**Table 1**

<b>Adjacent Property</b>	<b>Site</b>
<b>North side of property</b>	
Road (Plant Lane)/Open Field Open Field Building 229	Building 229 Building 756 Building 228
<b>West side</b>

<b>South side</b>	
Building 228 (VAAP) Open Field Parking lot	Building 229 Building 756 Building 228
<b>East side</b>	
School Trailers Open Field School Trailers	Building 229 Building 756 Building 228

**4.0 SITE HISTORY**

The site was obtained by AMC in 1941 for a Volunteer Army Ammunition Plant (VAAP). The VAAP is currently excess to the needs of the AMC. The Army Reserve responded in 1998 to the Department of Defense (DOD) screening request for reassignment of Buildings 228, 229, 756, and the associated underlying land.. Prior to ownership by the Army, the VAPP site was primarily used for agriculture. A list of previous owners can be seen in (Appendix A).

**5.0 SITE REGULATORY INFORMATION FOR PROPERTIES WITHIN .5 MILES**

To conduct task related to environmental database searches the services of Environmental Data Resources (EDR) were secured to identify, obtain, and review federal, state, and local databases and records to determine if the site, or any adjacent sites, have or may posed an environmental hazard.

A copy of the environmental database report can be found in Appendix B. The databases and information researched included the following:

- National Priority List (NPL)
- Comprehensive Environmental Resource, Compensation, and Liability Information System (CERCLIS)
- Comprehensive Environmental Resource, Compensation, and Liability Information System (CERC-NFRAP)
- Corrective Action Report (CORRACTS)
- Sanitary, Industrial, Demolition, Solid Waste Processing Facilities and Closed Landfills (SWF/LF)
- Resource Conservation/Recovery Information System TSD (RCRIS-TSD)
- Resource Conservation/Recovery Information System LQG (RCRIS-LQG)
- Resource Conservation/Recovery Information System SQG (RCRIS-SG)
- Emergency Response Notification System (ERNS)
- Leaking Underground Storage Tank (LUST)
- Facility Storage Tanks (UST)
- Aboveground Storage Tanks (AST)
- RCRA Administrative Action Tracking System (RAATS)
- Hazardous Materials Information Reporting System (HMIRS)

PCB Activity Database System (PADS)  
Facility Index System (FINDS)  
Toxic Chemical Release Inventory System (TRIS)  
Federal Superfund Liens (NPL Lien)  
Toxic Substances Control Act (TSCA)  
Material Licensing Tracking System (MLTS)  
Record of Decision (ROD)  
Superfund (CERCLA) Consent Decrees  
(CONSENT)  
Former Manufactured gas (Coal Gas) Sites (Coal Gas)

Research of the regulatory databases (Appendix B) revealed one Small Quantity Generator (SQG) within 1/8 mile of the site. The site revealed is an OMS owned by the Army Reserve. This site has no history of contamination.

## **6.0 SITE INVESTIGATION AND REVIEW OF HAZARDS**

### **6.1 Surface Water Characteristics:**

This 15 acre-site is relatively level and is situated on relatively high ground. There are no surface water bodies on this site and the topography is flat with very little change in elevation across the site.

### **6.2 UST/ASTs**

Based on search of all available records, site inspections, and interviews, two USTs currently exist on the site. There is One 10,000-gallon fiberglass UST, used for storage of gasoline and one 500-gallon fiberglass UST, used for used oil. As per, Mr. Eastburn, Tennessee Division of Underground Storage Tanks, during an inspection, the UST's both meet the December 22, 1998 upgrade requirements. The 10,000-gallon tank is continuously monitored for leaks by a Veeder Root Monitoring System. The 500-gallon UST does not have a leak detecting system or any other surface spillage control device. Leak detection on this tank is accomplished by utilizing a dipstick and tracking the volume indicated. Due to the small

volume of material added daily (less than 25 gallons) no spill or overfill protection is required.

In addition to the UST's, one 500 gallon diesel above ground storage tank was identified. It appeared to be in good shape and no stains were located in its vicinity

### **6.3 Chemicals/Hazardous Substances**

Since the acquisition by the AMC the only portion of the property that has utilized and/or stored hazardous materials is building 756. Building 756 was used as a vehicle maintenance shop and typically stored various oil products. Minor oil stains were identified on the asphalt.

### **6.4 Landfills**

Review of aerial photography, available records, and interviews revealed no evidence that this site was ever subject to any landfill activities.

### **6.5 Pits, Sumps, Drywells, and Catchbasins**

Review of available records, site reconnaissance, and interviews revealed no evidence of these facilities ever being present on site.

### **6.6 Polychlorinated Biphenyls (PCBs)**

Pole-mounted and ground based electrical transformers are located on the property. No leaks or stains were identified around the transformers.

### **6.7 Asbestos Containing Material (ACM)**

Asbestos surveys were completed for these sites. All asbestos appeared to be in good condition and contained.

### **6.8 Lead**

It can be assumed that the buildings likely contain lead paint due to the age of the buildings (1942). However, the paint appears to be in good condition.

## **7.0 REVIEW OF SPECIAL RESOURCES**

### **7.1 Land Use**

These sites have been used for administrative and motor pool operations since acquisition by AMC. The zoning for this site is commercial/industrial.

### **7.2 Wetlands**

Based on a site inspection no jurisdictional wetlands of significant size are apparent on the subject property or adjoining properties

### **7.3 Threatened/Endangered Species**

The site investigation concluded that there is no potential for occurrence of threatened or endangered species or their critical habitat on site of the proposed action.

### **7.4 Archeological/Historic Sites**

Research conducted during this EBS indicates that project area revealed no properties of architectural, historic, or archeological significance, which would be affected by the proposed project.

## **8.0 CONCLUSIONS**

There is no evidence of environmental liabilities such as a release of petroleum or hazardous substances on-site. In addition, there appears to be no evidence of a release or threatened release in the site vicinity. Therefore, there is no need for a phase II for this land transfer.

RE: Radon Monitor Test Results

This report lists the average radon concentration your radon monitor has been exposed to for the period between the reported start and end dates. The result is rounded to the nearest 0.1 picocuries per liter (pCi/l), the unit in which the radon concentration is expressed. Before making a decision about radon reduction actions, you may wish to retest for a longer period if the result is close to 4 pCi/l. If testing instructions were not followed, the result may not be accurate. Additional information is printed on both sides of this form.

Monitor Number	pCi/l	Test Location	Exposure Start	Exposure End Date
112381	1.1	TN002	06/06/01	09/18/01
112382	0.5	TN111 BLDG 756	06/06/01	09/18/01
112383	0.8	SUITE 109 TN015	06/18/01	09/19/01
112407	0.7	TN107 BUILDING 228	06/06/01	09/18/01

#### WHAT YOUR TEST RESULTS MEAN

The average indoor radon level in homes is estimated by the US EPA to be below 2 pCi/l. About 0.4 pCi/l is normally found in outside air. Congress has set a long-term goal that indoor radon levels be no more than outdoor levels. While this goal is not yet technologically achievable in all cases, the radon concentration in most homes with elevated concentrations can be reduced to below 2 pCi/l. However, US EPA believes that any radon exposure carries some risk. No level of radon is safe and you can reduce your risk of lung cancer by lowering your radon exposure. If your living patterns change and you begin occupying a level of your home lower than the level on which you have tested, you should retest your home on that lower level. Also, radon concentrations fluctuate daily, seasonally, and with weather conditions. This alpha track monitor provides the best averaging for these fluctuations. Therefore, you may wish to test again for a full year to average seasonal fluctuations or if exposure was for less than 90 days.

**WHAT YOUR TEST RESULTS MEAN**

The average indoor radon level in homes is estimated by the US EPA to be below 2 pCi/l. About 0.4 pCi/l is normally found in outside air. Congress has set a long-term goal that indoor radon levels be no more than outdoor levels. While this goal is not yet technologically achievable in all cases, the radon concentration in most homes with elevated concentrations can be reduced to below 2 pCi/l. However, US EPA believes that any radon exposure carries some risk. No level of radon is safe and you can reduce your risk of lung cancer by lowering your radon exposure. If your living patterns change and you begin occupying a level of your home lower than the level on which you have tested, you should retest your home on that lower level. Also, radon concentrations fluctuate daily, seasonally, and with weather conditions. This alpha track monitor provides the best averaging for these fluctuations. Therefore, you may wish to test again for a full year to average seasonal fluctuations or if exposure was for less than 90 days.

## WHAT SHOULD YOU DO

Since there is no known safe level of radon, there is always some risk. The risk can be reduced by lowering the radon level in your home. A variety of methods are used to reduce radon in a home. In some cases, sealing cracks and openings in floors and walls may help to prevent radon infiltration. In other cases, simple systems using pipes and fans may be used to reduce radon. These systems are called sub-slab depressurization and remove radon gas from below the basement floor or slab and the foundation before it enters the home. Their installation does not require major changes in the home. Similar systems can also be installed in houses with crawl spaces. Radon contractors may also have other methods that may work in your home. The right system depends on the design of your home and other factors. Ways to reduce radon in your home are in literature provided by the US EPA supported CONSUMER FEDERATION OF AMERICA RADON FIX-IT LINE at 1-800-644-6999 or your state radon office at the number listed below. If you have any specific questions regarding your alpha track radon monitor results, please write RSSI.

## REAL ESTATE TRANSACTIONS

Buyers and renters frequently ask about radon levels before they buy or rent a home. Some states require disclosure of your radon measurement results. Real estate transactions may happen quickly and there is often not enough time to measure radon concentrations with a long term device. The best thing to do is to save these results where you will be able to locate them in case a buyer or renter is interested in them. If necessary, take radon reduction steps now and retest so radon will not complicate a real estate transaction.

Some states including Delaware, Nebraska, New Jersey, New York, Pennsylvania, and others require that all radon measurement data be sent to the state. Notice to Pennsylvania Residents: The Radon Certification Act requires that anyone who provides any radon-related service or product to the general public must be certified by the Pennsylvania Department of Environmental Protection. You are entitled to evidence of certification from any person who provides such services or products. You are also entitled to a price list for services or products offered. All radon measurement data will be sent to the Department as required in the Act and will be kept confidential. If you have any questions, comments or complaints concerning persons who provide radon-related services, please contact the Department at the Bureau of Radiation Protection, Department of Environmental Protection, P.O. Box 2063, Harrisburg, PA 17105-2063 (717-783-3594).

**ASBESTOS INSPECTION REPORT**

---

**EXECUTIVE SUMMARY**

1. **INTRODUCTION**

Asbestos Building Inspectors from the Environmental Enterprise Group, Inc. (EEG) of Charleston, SC conducted an inspection to identify asbestos containing building materials (ACBM) at the US Army Reserve Center located on the Volunteer Army Ammunition Plant in Chattanooga Tennessee. For the purpose of this inspection, this facility is referred to as Chattanooga-2. The inspections were conducted on 3 December 2001 and the results of the inspections provide an inventory of ACBM in three (3) buildings. Temporary/portable buildings were not inspected for this project.

All inspectors were certified by an EPA accredited training center under the Asbestos Hazard Emergency Response Act (AHERA), as Building Inspectors. All inspectors and management planners are employees of EEG, Inc. Copies of training certificates are located in the **TRAINING** section of this report.

Suspect ACBM was identified and sampled in accordance with AHERA style guidelines (See Paragraph 7 for sampling strategy). Some materials suspected of being ACBM were assumed to be ACBM and not sampled. Assumed materials may include floor tile and ventilation transition boots. Some materials weren't identified as ACBM because they were portable and removable (e.g. blackboards, fire hoses,), were not safe to sample (e.g. electrical insulation), or sampling would have damaged the material and impaired the normal system operation/integrity (e.g. heating/ventilation/AC systems, furnace, boiler door and pipe gaskets).

Bulk samples were analyzed by the Environmental Hazards Services (EHS) laboratory of Richmond, Virginia. EHS is accredited by the National Voluntary Laboratory Accreditation Program (NVLAP) and the American Industrial Hygiene Association (AIHA) for asbestos analysis. Polarized Light Microscopy (PLM) was used to analyze samples.

Materials identified as ACBM and either sampled or assumed were designated a homogeneous area by similarity of color, texture and date of application. Each homogeneous area was assessed in accordance with the "Asbestos Facility Inventory/Assessment Protocol," NEESA 70.2-010, Developed by the Naval Facilities Engineering Service Center (NFESC).

# US ARMY RESERVE CENTER – CHATTANOOGA-2, TN

## ASBESTOS INSPECTION REPORT

---

The NFESC protocol establishes an algorithm rating for each homogeneous area based on condition, quantity, friability, exposure potential, number of persons exposed, building significance and percentage of asbestos present in the material. The **BUILDING SUMMARY TABLES** lists the ratings for each homogeneous area. The rating is heavily weighted by condition, friability, exposure potential and building significance. For the purposes of this inspection, all buildings were listed as occupied during the inspection.

### 2. **FINDINGS SUMMARY**

**BUILDING 228 (Administrative Building):** Confirmed highly friable ACM in the form of rope packing and non-friable ACM in the form of sheetrock mud, floor tile, floor tile mastic and vent duct mastic are located in the building.

**BUILDING 229 (Training Building):** Confirmed non-friable ACM in the form of sheetrock mud, floor tile, floor tile mastic and vent duct mastic are located in the building.

**BUILDING 756 (Maintenance Shop):** Confirmed non-friable ACM in the form of sheetrock mud, floor tile, floor tile mastic and vent duct mastic are located in the building.

See individual Building Summaries for detailed information on these materials. Buildings containing asbestos are required to be included in an Operations and Maintenance (O&M) Program. Any identified asbestos containing material not removed must be maintained following the guidelines of an O&M Plan.

### 3. **ACCESSABILITY**

There were times during the inspection process when all rooms were not accessible for inspection due to several reasons, including security. The rooms that were not inspected at this site were Rooms 109 & 114 in Building 228 and Room 112 in Building 229. Unique room numbers were assigned by the inspectors during the inspection visit (see attached floor plan for room numbers).

### 4. **RENOVATION/DEMOLITION**

# US ARMY RESERVE CENTER – CHATTANOOGA-2, TN

## ASBESTOS INSPECTION REPORT

---

The National Emission Standard for Hazardous Air Pollutants (NESHAP) 40 CFR Part 61 requires written notification to the local Air Quality Management District at least ten working days prior to renovation or demolition of ACBM in quantities of 260 linear feet, 160 square feet, 35 cubic feet, or greater, except in cases of emergencies.

Contractors are advised to verify most current regulations with the Local Air Quality Management District prior to start of any work.

### 5. **REPORT ORGANIZATION**

Specific, detailed information on each inspected building is noted in the *BUILDING SUMMARIES* section of this report and include the following:

- Photos of existing buildings

- Narrative description of the building with findings and recommendations

- Building Summary Table

- Laboratory Test Results Table

- Operations and Maintenance Table

- CADD drawing showing sample and asbestos locations

- Laboratory Chain of Custody and results forms

Following the *BUILDING SUMMARIES* is a tabbed section for *TRAINING*. Copies of each Inspector's appropriate certificates are included there.

### 6. **ABATEMENT COSTS**

EEG, Inc. inspectors found friable ACBM in Building 228 and non-friable ACBM in all three buildings inspected at this site. We recommend that the facilities Asbestos Program Manager initially focus their resources on all ACBM assessed as friable (H-9 in Bldg. 228). Abatement cost estimates for each building will be provided by a separate document, if requested, and will include labor, material, equipment, and disposal cost. The extent to which other costs will be covered must be negotiated separately and are beyond the scope of this report.

### 7. **SAMPLING STRATEGY**

## US ARMY RESERVE CENTER – CHATTANOOGA-2, TN ASBESTOS INSPECTION REPORT

---

The sampling and analysis of bulk samples was conducted in accordance with established AHERA guidelines. Unless otherwise stated, the following sampling scheme was utilized during the survey:

### Thermal System Insulation (TSI)

- 1) A minimum of 1 sample was taken of each homogenous area <6ft or <6 sq. ft.
- 2) A minimum of 3 samples was taken of each homogenous area >6FT or > 6 SQ FT.

### Surfacing Materials

- 1) A minimum of 3 samples were taken of each homogeneous area of material 1000 square feet (SF) or less.
- 2) A minimum of 5 samples were taken of each homogenous area of material greater than 1000 SF but less than 5000 SF.
- 3) A minimum of 7 samples were taken of each homogenous area of material greater than 5000 SF.

### Miscellaneous Materials (Including floor tiles, ceiling tiles and mastics)

A minimum of 2 samples

A comprehensive and thorough asbestos inspection was conducted on these facilities by certified and experienced Environmental Enterprise Group inspectors. Every effort was made to identify all asbestos containing building material (ACBM) in the facility, but due to random sampling techniques mandated by EPA regulations, the non-destructive sampling policy for this project and accessibility constraints, the possibility always exists that some ACBM remains undetected.

**US ARMY RESERVE CENTER – CHATTANOOGA-2, TN**  
**ASBESTOS INSPECTION REPORT**

---

**BUILDING SUMMARIES**

The following pages report observations noted and suggest actions required as a result of an asbestos inspection conducted by Environmental Enterprise Group, Inc. in December of 2001. Three (3) buildings at US Army Reserve Center located in Chattanooga, Tennessee, were inspected for possible presence of suspect/assumed asbestos. This section provides *Description, Findings, Observations, Recommended Abatement Action, and Recommendations for Operations and Maintenance* for each building inspected.

**The room numbers shown on the CAD drawings and referenced in the report were assigned by the inspectors at the time of inspection.** Some room numbers are prefixed by a letter to indicate the type of room. **E** indicates an entry to the building, **H** indicates a hallway, **R** is a roof, **S** is a stairwell, **A** is an attic area and **B** indicates basement rooms.

## ASBESTOS INSPECTION REPORT

---

### BUILDING 228: Reserve Center Admin Building

#### 1. DESCRIPTION:

Building 228 is a 4,640 square-foot building. It is a concrete block building with brick exterior and a flat rubber roof. The following information was identified during the survey and from the analysis of the samples taken:

- Nine homogeneous areas were identified during the initial survey.
- No homogeneous areas were assumed to contain asbestos.
- Nine of the homogeneous areas were suspected to contain asbestos and sampled to confirm.
- Five of the suspected homogeneous areas were confirmed to contain asbestos.
- Four of the suspected homogenous areas did not contain asbestos.

#### 2. FINDINGS:

Nine homogeneous areas with suspected ACM were identified. Twenty samples were collected and analyzed. Sample results are summarized in the Laboratory Test Results table in this section. Friable asbestos was found in one of the homogeneous areas.

**Confirmed ACM.** The following homogeneous areas sampled were confirmed to contain asbestos:

- H-1: MISC, FLOOR TILE & MASTIC, 12", Tan w/light brown streaks, was Non-friable and Not Damaged.
- H-2: MISC, MASTIC, VENT DUCT, Silver/gold, was Non-friable and Not Damaged.
- H-5: MISC, SHEETROCK/MUD, White, was Non-friable and Not Damaged.
- H-8: MISC, MASTIC, VENT DUCT, Black, was Non-friable and Not Damaged.
- H-9: TSI, ROPE PACKING, White, was Highly-friable and Damaged.

**Asbestos Free.** Asbestos was not detected in the following homogeneous areas:

- H-3: MISC, MASTIC, VENT DUCT, White
- H-4: TSI, FITTING, MUDDERED, Gray
- H-6: TSI, PIPE, CLOTH WRAPPED, Beige
- H-7: MISC, FLOOR TILE & MASTIC, 12", Cream w/brown & white marbling

**Assumed ACM.** The following homogeneous areas were assumed to contain asbestos: **NONE**

**US ARMY RESERVE CENTER – CHATTANOOGA-2, TN**  
**ASBESTOS INSPECTION REPORT**

---

**3. OBSERVATIONS:** Sheetrock joint compound (mud) contained 2% asbestos but total asbestos content of sheetrock and mud was <1%. Review State/local regulations prior to disturbing sheetrock in the building.

**4. RECOMMENDED ABATEMENT ACTIONS:**

Recommended actions for the following homogeneous areas:

- H-1: MISC, FLOOR TILE & MASTIC, 12", Tan w/light brown streaks: O&M
- H-2: MISC, MASTIC, Silver/gold: O&M
- H-5: MISC, SHEETROCK/MUD, White: O&M
- H-8: MISC, MASTIC, Black: O&M
- H-9: TSI, ROPE PACKING, White: Remove

**5. RECOMMENDATIONS FOR OPERATIONS AND MAINTENANCE:**

Operations and Maintenance recommendations for confirmed and assumed homogeneous areas of ACM are found in the Operations & Maintenance Table of this section. The materials listed below should be maintained following the guidelines of an O & M Plan during regular maintenance and small-scale repair activities until removed.

MISC FLOOR TILE & MASTIC is Confirmed, Non-friable ACM.

H-1 (FLOOR TILE & MASTIC, 12", Tan w/light brown streaks) is located in Rooms 100, 101, 102, 103, 104, 105, 107, 108, 110 & Hallway H-100.

MISC MASTIC is Confirmed, Non-friable ACM.

H-2 (MASTIC, Silver/gold) is located in Rooms 100, 101, 102, 108, 113 & H-100.

H-8 (MASTIC, Black) is located in Room 111.

TSI ROPE PACKING is Confirmed, Highly-friable ACM.

H-9 (ROPE PACKING, White) is located in Room 115 (Mechanical Room).

MISC SHEETROCK/MUD is Confirmed, Non-friable ACM.

H-5 (SHEETROCK/MUD, White) is located in Rooms 103, 104, 105, 106, 112, 113 & H-100.

## ASBESTOS INSPECTION REPORT

---

### BUILDING 229: Reserve Training Building

#### 1. DESCRIPTION:

Building 229 is a 5,775 square-foot building. It is a concrete block building with brick exterior and a flat rubber roof. It was constructed in 1972. The following information was identified during the survey and from the analysis of the samples taken:

- Six homogeneous areas were identified during the initial survey.
- No homogeneous areas were assumed to contain asbestos.
- Six of the homogeneous areas were suspected to contain asbestos and sampled to confirm.
- Five of the suspected homogeneous areas were confirmed to contain asbestos.
- One of the suspected homogenous areas did not contain asbestos.

#### 2. FINDINGS:

Six homogeneous areas with suspected ACM were identified. Twelve samples were collected and analyzed. Sample results are summarized in the Laboratory Test Results table in this section. Friable asbestos was not found in any homogeneous areas.

**Confirmed ACM.** The following homogeneous areas sampled were confirmed to contain asbestos:

- H-1: MISC, FLOOR TILE & MASTIC, 12", Lime green w/white streaks, was Non-friable and Not Damaged.
- H-2: MISC, MASTIC, VENT DUCT, Gray, was Non-friable and Not Damaged.
- H-4: MISC, SHEETROCK/MUD, White, was Non-friable and Not Damaged.
- H-5: MISC, FLOOR TILE & MASTIC, 12", White w/black streaks, was Non-friable and Not Damaged.
- H-6: MISC, FLOOR TILE MASTIC ONLY, Black, was Non-friable and Not Damaged.

**Asbestos Free.** Asbestos was not detected in the following homogeneous areas:

- H-3: MISC, GROUT, Gray

**Assumed ACM.** The following homogeneous areas were assumed to contain asbestos: **NONE**

**US ARMY RESERVE CENTER – CHATTANOOGA-2, TN**  
**ASBESTOS INSPECTION REPORT**

---

**3. OBSERVATIONS: NONE**

**4. RECOMMENDED ABATEMENT ACTIONS:**

Recommended actions for the following homogeneous areas:

- H-1: MISC, FLOOR TILE & MASTIC, 12", Lime green w/white streaks: **O&M**
- H-2: MISC, MASTIC, Gray: **O&M**
- H-4: MISC, SHEETROCK/MUD, White: **O&M**
- H-5: MISC, FLOOR TILE & MASTIC, 12", White w/black streaks: **O&M**
- H-6: MISC, FLOOR TILE MASTIC ONLY, Black: **O&M**

**5. RECOMMENDATIONS FOR OPERATIONS AND MAINTENANCE:**

Operations and Maintenance recommendations for confirmed and assumed homogeneous areas of ACM are found in the Operations & Maintenance Table of this section. The materials listed below should be maintained following the guidelines of an O & M Plan during regular maintenance and small-scale repair activities until removed.

MISC FLOOR TILE & MASTIC is Confirmed, Non-friable ACM.

H-1 (FLOOR TILE & MASTIC, 12", Lime green w/white streaks) is located in Rooms 103, 104, 109, 110, 113, 114, 115, 116, Entry E-001 and Hallways H-100 & H-101.

H-5 (FLOOR TILE & MASTIC, 12", White w/black streaks) is located in Rooms 107, 108, 117 & H-102.

MISC FLOOR TILE MASTIC ONLY is Confirmed, Non-friable ACM.

H-6 (FLOOR TILE MASTIC ONLY, Black) is located in Room 117.

MISC MASTIC is Confirmed, Non-friable ACM.

H-2 (MASTIC, Gray) is located in Rooms 103, 104, 107, 108, 109, 110, 113, 114, 115, 116, 117, E-001, H-100 & H-101.

MISC SHEETROCK/MUD is Confirmed, Non-friable ACM.

H-4 (SHEETROCK/MUD, White) is located in Rooms 100, 101, 102, 105, 106 & 111.

BUILDING 229 – TRAINING BUILDING – CHATTANOOGA-2, TN

**US ARMY RESERVE CENTER – CHATTANOOGA-2, TN**  
**ASBESTOS INSPECTION REPORT**

---

**BUILDING 756: Maintenance Shop**

**1. DESCRIPTION:**

Building 756 is a 14,340 square-foot building. It is a 7-bay shop constructed of concrete block with a brick and metal exterior and a flat rubber roof. It was constructed in 1974. The following information was identified during the survey and from the analysis of the samples taken:

- Eight homogeneous areas were identified during the initial survey.
- No homogeneous areas were assumed to contain asbestos.
- Eight of the homogeneous areas were suspected to contain asbestos and sampled to confirm.
- Three of the suspected homogeneous areas were confirmed to contain asbestos.
- Five of the suspected homogenous areas did not contain asbestos.

**2. FINDINGS:**

Eight homogeneous areas with suspected ACM were identified. Twenty samples were collected and analyzed. Sample results are summarized in the Laboratory Test Results table in this section. Friable asbestos was not found in any homogeneous areas.

**Confirmed ACM.** The following homogeneous areas sampled were confirmed to contain asbestos:

- H-4: MISC, FLOOR TILE & MASTIC, Tan, was Non-friable and Not Damaged.
- H-6: MISC, SHEETROCK/MUD, White, was Non-friable and Not Damaged.
- H-7: MISC, MASTIC, VENT DUCT, White, was Non-friable and Not Damaged.

**Asbestos Free.** Asbestos was not detected in the following homogeneous areas:

- H-1: TSI, FITTING, MUDDERED, Gray
- H-2: TSI, FITTING, MUDDERED, Tan
- H-3: TSI, PIPE, METAL JACKETED, White
- H-5: MISC, GROUT, CERAMIC TILE, White
- H-8: SURFACING, PLASTER, White

**Assumed ACM.** The following homogeneous areas were assumed to contain asbestos: **NONE**

**3. OBSERVATIONS: NONE**

**US ARMY RESERVE CENTER – CHATTANOOGA-2, TN**  
**ASBESTOS INSPECTION REPORT**

---

**4. RECOMMENDED ABATEMENT ACTIONS:**

Recommended actions for the following homogeneous areas:

- H-4: MISC, FLOOR TILE & MASTIC, Tan: **O&M**
- H-6: MISC, SHEETROCK/MUD, White: **O&M**
- H-7: MISC, MASTIC, White: **O&M**

**5. RECOMMENDATIONS FOR OPERATIONS AND MAINTENANCE:**

Operations and Maintenance recommendations for confirmed and assumed homogeneous areas of ACM are found in the Operations & Maintenance Table of this section. The materials listed below should be maintained following the guidelines of an O & M Plan during regular maintenance and small-scale repair activities until removed.

MISC FLOOR TILE & MASTIC is Confirmed, Non-friable ACM.

H-4 (FLOOR TILE & MASTIC, Tan) is located in Rooms 105, 106 & 200.

MISC MASTIC is Confirmed, Non-friable ACM.

H-7 (MASTIC, White) is located in Rooms 200, 201, 202, 203, 204 & 207.

MISC SHEETROCK/MUD is Confirmed, Non-friable ACM.

H-6 (SHEETROCK/MUD, White) is located in Rooms 107, 200, 201, 202, 203, 204, 207 & Stairway S-001.

MEMORANDUM FOR Commander, 81st Regional Support Command (RSC) Facilities

SUBJECT: Air Quality

1. The 81st Regional Support Command (RSC) has completed a command survey to identify sources of air pollution emissions. At this time, there is no stationary or mobile air pollution sources identified, which would constitute the submission of a Title V, Air Pollution Control permit application.
2. This memorandum should be used to avoid negative Environmental Compliance Assessment Army Reserve findings as it relates to Air Quality. This memorandum is to be filed and maintained in the Environmental Records Binder. The point of contact for this action is Deputy Chief of Staff, Installation Management, Chief, Environmental Division at 877-749-9063, ext 1588.

A handwritten signature in black ink, appearing to read "Michael O'Steen".

Dear Mr. Francis:

The Division of Underground Storage Tanks (Division) has received the May 14, 2001 Permanent Closure Report for the referenced facility. The analytical results do not indicate contamination above the applicable cleanup levels. Based on the information available, the UST's approved for closure on the March 12, 2001 application can be considered closed. At this time no further investigation is required. However, the Division reserves the right to require additional action if necessary.

Rule 1200-1-15-.02(3)(h) states, in part: "Any change in the status of the tanks at a petroleum UST facility shall be reported within thirty (30) days of said change. This includes but is not limited to changes of ownership, upgrading or replacement of tanks, changes in mailing address, and changes in service. Such reports shall be made using an amended notification form."

If an amended notification form has not been submitted, complete and mail the enclosed form to:

**DIVISION OF UNDERGROUND STORAGE TANKS**

**PERMANENT CLOSURE REPORT**

The Responsible Party (RP) of the underground storage tank (UST) system shall complete and submit the **original** of this report within 45 days of collecting samples during the UST system closure assessment. Tennessee Code Annotated (T.C.A) #68-215-103(16) defines the Responsible Party as the owner and/or operator of a petroleum site or any person who at the time of the release which caused the contamination was the owner and/or operator of a petroleum underground storage tank.

Include the following appendices in the report. Attach extra sheets if necessary.

Appendix A: A table containing the field screening and analytical results. All results shall be reported in parts per million (ppm). The results shall be properly identified and correlated with the sampling locations on the site map. If water was encountered during closure-in-place, include the monitoring well information required in the Environmental Assessment Guidelines.

Appendix B: The original or carbon copy of the laboratory analysis sheets. Photocopies are not acceptable. All laboratory analysis sheets shall include the information specified in the UST System Closure Assessment Guidelines.

Appendix C: Documentation for treatment and/or disposal of soil, sludge, liquid, tanks and piping (i.e. Application to Treat Petroleum Contaminated Soil, Solid Waste Permits, Landfill Disposal Manifests, etc.)

Appendix D: A Copy of the Amended Notification form shall be submitted with this report. Send the original Amended Notification form to the UST Nashville Central Office.

1. UST Facility ID # 0-330776
2. Facility Name: Volunteer Army Ammunition Plant
3. Division personnel with the appropriate field office were notified at least one working day before collecting soil samples for the UST system closure assessment? Yes\_\_ No X

Dry ice(1.5 lb/100gal)\_\_ Other

6. Product piping was drained into the tank. Yes X No\_\_

7. Product piping was: Capped\_\_ Removed X

8. All liquid/sludge was removed from the UST system. Yes X No\_\_ None encountered\_\_

9. Method of liquid/sludge storage N/A

10. Method of liquid/sludge disposal Transported off-site by A-1 Shipley's Waste Oil

Manifests included in Appendix D. Yes X No\_\_ Not applicable\_\_

11. Tank was labeled in accordance with the UST regulations Appendix 6(4)(f).  
Yes\_\_ No\_\_ Not applicable X

12. Method of UST system storage/disposal:

Cut up for disposal X Stored on site\_\_ Stored off site\_\_  
Other Landfill

UST systems stored on or off site are subject to Rules 1200-1-15-.07(2)(e), (f) and (g) and Appendix 7.

13. Location of UST system storage/disposal: Meadow Branch Landfill Chattanooga, TN  
Santek Environmental, Inc. Cleveland, TN

Certificate of disposal included in Appendix C. Yes X No\_\_  
If no, explain \_\_\_\_\_

14. Amount of material excavated during UST system closure: 123 cubic yards  
Approximately 100 yd3 of backfill material removed from gasoline UST basin.  
Approximately 23 yd3 of backfill material removed from oil UST basin.

15. Total amount of contaminated material overexcavated after removal of the UST system:  
0 cubic yards

If more than 100 cubic yards of material was overexcavated, Division personnel in the appropriate field office should have been contacted.

Division personnel in the appropriate field office were contacted. Yes\_\_ No\_\_ Not Applicable X

If yes:

Person contacted \_\_\_\_\_

Reported by \_\_\_\_\_

All excavated material remaining on the site of generation or on a site owned by the responsible party or subsidiary of the responsible party shall be placed on and covered with plastic and bermed. Sampling the excavated material in accordance with Technical Guidance Document -005, must be completed prior to proper disposal.

If petroleum contaminated material is managed in accordance with Technical Guidance Document -009, the appropriate Application to Treat Petroleum Contaminated Soil shall be completed and submitted to the local field office for approval. If the contaminated material is to be treated on a site owned by a Third Party, contact the Tennessee Division of Solid Waste Management.

All excavations shall be backfilled with material containing levels at or below 5 ppm benzene and/or 100 ppm TPH.

16. Mark all that apply regarding the management of the excavated material:  
Stockpiled onsite\_\_ Thermal treatment onsite\_\_ Thermal treatment offsite\_\_ Landfilled\_\_  
Other: Used to backfill the tank pits  
Documentation is included in Appendix C. Yes\_\_ No\_\_ Not applicable X
17. All sample containers were supplied by a Division approved laboratory. Yes X No\_\_
18. All samples were placed directly into the appropriate containers, immediately after collection.  
Yes X No\_\_
19. Immediately after collection all samples were placed on ice and maintained at 4° C until delivered to a Division approved laboratory. Yes X No\_\_
20. Laboratory confirmation of petroleum contamination or discovery of free product was reported to the Division within 72 hours. Yes\_\_ No\_\_ Not applicable X

Person contacted \_\_\_\_\_

**North Charleston, SC 29405-2106**

**MARCH 2004**

### **DISCLAIMER**

This document is provided for informational purposes only. The information contained in this document and these references represents the current view of Environmental Enterprise Group, Inc. on the issues discussed as of the date of publication.

Information provided in this document is provided 'as is' without warranty of any kind, either express or implied, including but not limited to the implied warranties of merchantability, fitness for a particular purpose and freedom from infringement. The user assumes the entire risk as to the accuracy and the use of this document.

This survey is of readily accessible areas of the building and is limited to visual observations and XRF analysis of apparent conditions/components tested and existing at the time of the survey only. Latent and concealed defects and deficiencies are excluded from the survey; equipment items and systems were not dismantled. EEG assumes no responsibility or obligation to update these findings.

Maintenance and other items may be discussed, but they are not a part of this survey. The report is not a compliance survey or certification for past or present governmental codes or regulation of any kind, unless specifically stated for that purpose. The survey and report only address the presence of or danger from the potentially harmful substance of lead in paint. The survey and report do not address the presence of or danger from other potentially harmful substances and environmental hazards including but not limited to radon, asbestos, urea formaldehyde, toxic or flammable chemicals, and water and airborne hazards. Also excluded are surveys of and report on wells, septic systems, security systems, central vacuum systems, sprinkler systems, fire and safety equipment and the presence of rodents, termites, and other insects.

This document may be copied and distributed subject to the following conditions:

1. All text must be copied without modification and all pages must be included.
2. This document may not be distributed for profit.

## **EXECUTIVE SUMMARY**

The United States Army Reserve, 81<sup>st</sup> Regional Support Command, retained the Environmental Enterprise Group, Inc (EEG) to perform a modified lead-based paint (LBP) survey of the United States Army Reserve Center (USARC) located in Chattanooga, Tennessee.

A lead inspector from EEG performed the survey using a Niton Model XL700 X-ray Fluorescence (XRF) analyzer (serial # 869) to measure the lead content of various painted surfaces throughout the building. The inspection was performed using modified guidelines of the U.S. Department of Housing and Urban Development (HUD) Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing, June 1995 and 1997. The inspector visually examined the building and grouped similar components together for survey purposes. The inspector then selected a small number of the grouped components for survey to obtain a representative characteristic analysis of similar components throughout the building. Dust and soil samples were not collected.

U.S. Environmental Protection Agency (EPA) and HUD guidelines specify a positive determination of lead in paint when the lead content is equal to or greater than 1.0 milligram of lead per square centimeter ( $\text{mg}/\text{cm}^2$ ) using an XRF analyzer. A negative classification does not necessarily mean the component is lead free. The Occupational Safety and Health Administration (OSHA) Lead in Construction Standard (29 CFR 1926.62) defines lead based paint as any detectable amount and guidelines must be followed.

253 LBP readings and calibration checks were taken using the XRF analyzer. The components that contained consistently detectable amounts of lead were interior and exterior doors and casings, door and window lintels, and structural steel components. All of the exterior wood components of Building 202 had significantly elevated levels of lead. Results are included as Appendix A, XRF Field Data Results.

## **1.0 INTRODUCTION**

The United States Army Reserve, 81<sup>st</sup> Regional Support Command, retained the Environmental Enterprise Group, Inc (EEG) to perform a modified lead-based paint (LBP) survey of the United States Army Reserve Center (USARC) located in Chattanooga, Tennessee. Building 228, the Administration Building, is a 4,640 square foot single story concrete block brick veneer building. Date of construction is unknown, however it is very similar to Building 229. The Reserve Center Training Center, Building 229, is a 5,775 square foot single story concrete block brick veneer building constructed in 1972. Building 756, the Maintenance Shop, is a 14,340 two story concrete block with brick and metal exteriors. It has 7 vehicle bays and was constructed in 1974. Building 202 is a single story wooden framed and sided structure with a large open carport and is in extremely bad condition.

## **2.0 LEAD-BASED PAINT TESTING PROCEDURES**

The facility was inventoried and room equivalents identified. Each room equivalent was further classified into components. The component substrate was then identified. All of these elements make up a testing combination. The following paragraphs describe the wall, room, and component description and designation:

### **Definition of Room Equivalent:**

A room equivalent is an identifiable part of a building, such as a room, an exterior side, or an exterior area. Hallways, stairways, and exterior areas, such as loading docks, parking lots, and each side of a building, are all examples of room equivalents.

### **Delineation of Room Equivalent:**

Each room equivalent is made up of *components*. Components may be located inside or outside a building. For example, components in a room are the ceiling, floor, walls, a door and its casing, the window sash, and window casings. The *substrate* is the material underneath the paint. Many substrates exist, however, the industry standards recommend classifying substrates into one of six

substrate types: brick, concrete, drywall, metal, plaster, and wood. These substrate types are intended to include a broad range of materials. If the true substrate is not one of the six types, the substrate that most closely matches the true substrate is selected. For substrates on top of substrates, such as plaster on concrete, the substrate directly beneath the painted surface is used. The room equivalent, component, and substrate characterize a *testing combination*. In some cases, visible color of paint may also be used to further define unique testing combinations. The *test location* is a specific area on a testing combination where the XRF instrument tests for LBP.

#### Exterior Structure Designations:

The exterior sides of the building are lettered, starting with the letter A. The A side of the building is the main entry side of the building. Starting on the A side, the remaining sides are lettered consecutively (B, C, D) going clockwise around the building (assuming you are viewing the building from above).

#### Interior Designations, Room Names, Room Sides, and Component Identification:

Unique rooms (such as halls) in the facility are named on the inspection report. If there is more than one of a certain type of named room, they are numbered. (For example, if there are three halls, they are labeled "Hall 1," "Hall 2," etc.). Other rooms, which cannot be uniquely named because the use may change, are numbered. Certain building components that are adjacent to each other and not likely to have a different painting history are grouped together in a single testing combination. Every room in the building has each of its sides lettered in accordance with the building's exterior lettering.

#### Sampling Strategies:

The sampling strategy adheres to the EPA Performance Characteristic Sheet for the particular XRF instrument used, as well as the manufacturer's modifications and recommendations. The XRF used for detection of LBP in these buildings was the NITON XL700 Spectrum Analyzer Lead Detector, manufactured by NITON Corporation, 74 Loomis Street, Bedford, Massachusetts 01730-0368.

Evaluation of the Quality of Inspection:

Evaluation methods include direct observation of the XRF testing, calibration checks prior to testing, periodically throughout the day, at the end of the day, and repeat testing of painted surfaces. Repeat testing entails randomly selecting and testing (in a different spot) a number of testing combinations from previously tested areas. Usually, the XRF instrument used in the original inspection is used for retesting. The repeat results are compared with the previous results of the same testing combinations. Results should not differ from the original readings by more than the Retest Tolerance Limit, as specified in the XRF Performance Characteristic Sheet. If the difference is less than the Retest Tolerance Limit, the inspection has passed the retest. If the difference of the overall averages equals or exceeds the Retest Tolerance Limit, the procedure should be repeated with new testing combinations. If the difference of the overall averages is equal to or greater than the Retest Tolerance Limit a second time, then the inspection is considered deficient and should be re-accomplished. Appendix C includes the Quality Evaluation Results and the formula for obtaining the Retest Tolerance Limit.

**3.0 IDENTIFICATION OF LEAD-BASED PAINT**

Summary of Lead-Based Paint Identified in Facility:

A total 253 XRF samples and calibrations were taken throughout the building. The components that contained significant detectable amounts of lead were:

Buildings 228 – exterior metal porch components and railings, and interior door casings

Building 229 - interior and exterior doors and casings, door and window lintels, and exterior structural steel components

Building 756 - interior doors and casings, stair rails

Building 202 – all exterior painted surfaces

OSHA Lead in Construction Standard (29 CFR 1926.62) defines lead based paint as any detectable amount and guidelines must be followed prior to disturbing these surfaces. Appendix A contains the room-by-room results of the paint sampling conducted in the facility. Appendix B shows the floor plans.

Depth Index

The Depth Index (DI) is an indication of the amount of non-lead paint covering the lead detected by the XRF. A DI less than 1.5 indicates lead near the surface layer of paint; between 1.5 and 4 indicates moderately covered lead; and greater than 4 indicates deeply buried lead.

# **APPENDIX A**

## **Lead In Paint XRF Field Data Sheets**

**The positive (POS) and negative (NEG) results reported on the following data sheets are based on the EPA/HUD Guidelines that specify a positive determination of lead when the lead content is greater than or equal to 1.0 mg/cm<sup>2</sup> using an XRF analyzer.**

Original XRF #	Original Result	Retest XRF#	Retest Result	Average	Squared
95	0.0200	98	0.0200	0.0200	0.0004
96	0.1500	97	0.0700	0.1100	0.0121
102	0.0700	105	0.0300	0.0500	0.0025
103	0.0600	106	0.0600	0.0600	0.0036
104	0.1000	107	0.0100	0.0550	0.0030
<b>Total</b>	<b>0.4000</b>		<b>0.1900</b>	<b>0.2950</b>	<b>0.0216</b>

Original Reading Average           **0.0800**  
Retest Reading Average           **0.0380**  
   **0.0420**

**Absolute Difference                   0.0420**

$$\begin{aligned}
 C &= 0.0216 \\
 D &= 0.0216 \times 0.0072 = 0.0002 \\
 E &= 0.0002 + 0.0320 = 0.0322 \\
 F &= 0.0322 \text{ sqrt} = 0.1793 \\
 \text{Retest Tolerance Limit} &= 0.1793 \times 1.645 = 0.2950
 \end{aligned}$$

**Retest Tolerance Limit = 0.2950**  
**Absolute Difference = 0.0420**

**Inspection passed retest: 0.0420 < 0.2950**

The Retest Tolerance Limit was computed using the following steps

1. Calculate the average of the original XRF result and retest XRF result for each combination.
2. Square the average of each testing combination
3. Add the ten squared averages together. This quantity is called C.
4. Multiply the number C by 0,0072. This quality is called D.
5. Add the number 0.032 to D. This quantity is called E.
6. Take the square root of E. Call this quantity F.
7. Multiply F by 1.645. The result is the Retest Tolerance Limit.
8. Find the absolute difference of the two averages.

If the absolute difference is less than the Retest Tolerance Limit, the inspection has passed retest. If the difference of the overall averages equals or exceeds the Retest Tolerance Limit, the procedure should be repeated with ten new testing combinations. If the difference of the overall averages is equal to or greater than the Retest Tolerance Limit a second time, the inspection is considered deficient. Retest Tolerance was performed in accordance with HUD/EPA Performance Characteristics Sheet for Niton XRF instruments.

# EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

## TARGET PROPERTY INFORMATION

### ADDRESS

6703 BONNY OAKS DRIVE  
CHATTANOOGA, TN 37363

### COORDINATES

Latitude (North): 35.074500 - 35° 4' 28.2"  
Longitude (West): 85.154400 - 85° 9' 15.8"  
Universal Transverse Mercator: Zone 16  
UTM X (Meters): 668275.1  
UTM Y (Meters): 3882664.8  
Elevation: 758 ft. above sea level

### USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

Target Property Map: 35085-A2 EAST CHATTANOOGA, TN  
Most Recent Revision: 1976

### TARGET PROPERTY SEARCH RESULTS

The target property was identified in the following government records. For more information on this property see page 6 of the attached EDR Radius Map report:

<u>Site</u>	<u>Database(s)</u>	<u>EPA ID</u>
US ARMY RESERVES 81ST REGIONAL SUPPORT COMMAND -BUILDING 232 6703 BONNY OAKS DR CHATTANOOGA, TN 37421	UST	N/A
DEPT. OF THE ARMY, VAAP 6703 BONNY OAKS DRIVE CHATTANOOGA, TN 37422	PADS CERCLIS RCRA-SQG FINDS	TN6210020933

### DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

Other Pertinent Environmental Activity Identified at Site:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **FEDERAL RECORDS**

### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/19/2006	Source: EPA
Date Data Arrived at EDR: 05/05/2006	Telephone: N/A
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 08/02/2006
Number of Days to Update: 17	Next Scheduled EDR Contact: 10/30/2006
	Data Release Frequency: Quarterly

### **Proposed NPL: Proposed National Priority List Sites**

Date of Government Version: 04/19/2006	Source: EPA
Date Data Arrived at EDR: 05/05/2006	Telephone: N/A
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 08/02/2006
Number of Days to Update: 17	Next Scheduled EDR Contact: 10/30/2006
	Data Release Frequency: Quarterly

### **DELISTED NPL: National Priority List Deletions**

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/19/2006	Source: EPA
Date Data Arrived at EDR: 05/05/2006	Telephone: N/A
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 08/02/2006
Number of Days to Update: 17	Next Scheduled EDR Contact: 10/30/2006
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **NPL RECOVERY:** Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/21/2006
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/20/2006
	Data Release Frequency: No Update Planned

## **CERCLIS:** Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/19/2006	Source: EPA
Date Data Arrived at EDR: 06/22/2006	Telephone: 703-413-0223
Date Made Active in Reports: 08/23/2006	Last EDR Contact: 06/22/2006
Number of Days to Update: 62	Next Scheduled EDR Contact: 09/18/2006
	Data Release Frequency: Quarterly

## **CERCLIS-NFRAP:** CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 02/01/2006	Source: EPA
Date Data Arrived at EDR: 03/21/2006	Telephone: 703-413-0223
Date Made Active in Reports: 04/13/2006	Last EDR Contact: 06/23/2006
Number of Days to Update: 23	Next Scheduled EDR Contact: 09/18/2006
	Data Release Frequency: Quarterly

## **CORRACTS:** Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/15/2006	Source: EPA
Date Data Arrived at EDR: 03/17/2006	Telephone: 800-424-9346
Date Made Active in Reports: 04/13/2006	Last EDR Contact: 09/05/2006
Number of Days to Update: 27	Next Scheduled EDR Contact: 12/04/2006
	Data Release Frequency: Quarterly

## **RCRA:** Resource Conservation and Recovery Act Information

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/13/2006	Source: EPA
Date Data Arrived at EDR: 06/28/2006	Telephone: 800-424-9346
Date Made Active in Reports: 08/23/2006	Last EDR Contact: 08/22/2006
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/20/2006
	Data Release Frequency: Quarterly

### **ERNS:** Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2005	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/12/2006	Telephone: 202-260-2342
Date Made Active in Reports: 02/21/2006	Last EDR Contact: 07/25/2006
Number of Days to Update: 40	Next Scheduled EDR Contact: 10/23/2006
	Data Release Frequency: Annually

### **HMIRS:** Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 07/03/2006	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 07/19/2006	Telephone: 202-366-4555
Date Made Active in Reports: 08/23/2006	Last EDR Contact: 07/19/2006
Number of Days to Update: 35	Next Scheduled EDR Contact: 10/16/2006
	Data Release Frequency: Annually

### **US ENG CONTROLS:** Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/21/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2006	Telephone: 703-603-8905
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 09/07/2006
Number of Days to Update: 56	Next Scheduled EDR Contact: 10/02/2006
	Data Release Frequency: Varies

### **US INST CONTROL:** Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/21/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2006	Telephone: 703-603-8905
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 09/07/2006
Number of Days to Update: 56	Next Scheduled EDR Contact: 10/02/2006
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **DOD:** Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2004	Source: USGS
Date Data Arrived at EDR: 02/08/2005	Telephone: 703-692-8801
Date Made Active in Reports: 08/04/2005	Last EDR Contact: 08/11/2006
Number of Days to Update: 177	Next Scheduled EDR Contact: 11/06/2006
	Data Release Frequency: Semi-Annually

## **FUDS:** Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 12/05/2005	Source: U.S. Army Corps of Engineers
Date Data Arrived at EDR: 01/19/2006	Telephone: 202-528-4285
Date Made Active in Reports: 02/21/2006	Last EDR Contact: 07/17/2006
Number of Days to Update: 33	Next Scheduled EDR Contact: 10/02/2006
	Data Release Frequency: Varies

## **US BROWNFIELDS:** A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients--States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 07/10/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/13/2006	Telephone: 202-566-2777
Date Made Active in Reports: 09/06/2006	Last EDR Contact: 09/11/2006
Number of Days to Update: 55	Next Scheduled EDR Contact: 12/11/2006
	Data Release Frequency: Semi-Annually

## **CONSENT:** Superfund (CERCLA) Consent Decrees

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: 12/14/2004	Source: Department of Justice, Consent Decree Library
Date Data Arrived at EDR: 02/15/2005	Telephone: Varies
Date Made Active in Reports: 04/25/2005	Last EDR Contact: 07/24/2006
Number of Days to Update: 69	Next Scheduled EDR Contact: 10/23/2006
	Data Release Frequency: Varies

## **ROD:** Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 07/10/2006	Source: EPA
Date Data Arrived at EDR: 07/21/2006	Telephone: 703-416-0223
Date Made Active in Reports: 09/06/2006	Last EDR Contact: 07/06/2006
Number of Days to Update: 47	Next Scheduled EDR Contact: 10/02/2006
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **UMTRA:** Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 11/04/2005	Source: Department of Energy
Date Data Arrived at EDR: 11/28/2005	Telephone: 505-845-0011
Date Made Active in Reports: 01/30/2006	Last EDR Contact: 09/05/2006
Number of Days to Update: 63	Next Scheduled EDR Contact: 12/18/2006
	Data Release Frequency: Varies

## **ODI:** Open Dump Inventory

An open dump is defined as a disposal facility that does not comply with one or more of the Part 257 or Part 258 Subtitle D Criteria.

Date of Government Version: 06/30/1985	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/09/2004	Telephone: 800-424-9346
Date Made Active in Reports: 09/17/2004	Last EDR Contact: 06/09/2004
Number of Days to Update: 39	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## **PRP:** Potentially Responsible Parties

A listing of verified Potentially Responsible Parties

Date of Government Version: 07/20/2006	Source: EPA
Date Data Arrived at EDR: 07/21/2006	Telephone: 202-564-6064
Date Made Active in Reports: 08/22/2006	Last EDR Contact: 07/06/2006
Number of Days to Update: 32	Next Scheduled EDR Contact: 10/02/2006
	Data Release Frequency: Quarterly

## **TRIS:** Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2004	Source: EPA
Date Data Arrived at EDR: 06/22/2006	Telephone: 202-566-0250
Date Made Active in Reports: 08/23/2006	Last EDR Contact: 06/22/2006
Number of Days to Update: 62	Next Scheduled EDR Contact: 09/18/2006
	Data Release Frequency: Annually

## **TSCA:** Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2002	Source: EPA
Date Data Arrived at EDR: 04/14/2006	Telephone: 202-260-5521
Date Made Active in Reports: 05/30/2006	Last EDR Contact: 07/17/2006
Number of Days to Update: 46	Next Scheduled EDR Contact: 10/16/2006
	Data Release Frequency: Every 4 Years

## **FTTS:** FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 07/14/2006	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 07/18/2006	Telephone: 202-566-1667
Date Made Active in Reports: 09/06/2006	Last EDR Contact: 06/19/2006
Number of Days to Update: 50	Next Scheduled EDR Contact: 09/18/2006
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **FTTS INSP:** FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

Date of Government Version: 07/14/2006	Source: EPA
Date Data Arrived at EDR: 07/18/2006	Telephone: 202-566-1667

Number of Days to Update: 50	Next Scheduled EDR Contact: 09/18/2006
	Data Release Frequency: Quarterly

## **SSTS:** Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2004	Source: EPA
Date Data Arrived at EDR: 05/11/2006	Telephone: 202-564-4203
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 07/17/2006
Number of Days to Update: 11	Next Scheduled EDR Contact: 10/16/2006
	Data Release Frequency: Annually

## **ICIS:** Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 02/13/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/21/2006	Telephone: 202-564-5088
Date Made Active in Reports: 05/11/2006	Last EDR Contact: 07/17/2006
Number of Days to Update: 20	Next Scheduled EDR Contact: 10/16/2006
	Data Release Frequency: Quarterly

## **PADS:** PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 07/07/2006	Source: EPA
Date Data Arrived at EDR: 08/09/2006	Telephone: 202-566-0500
Date Made Active in Reports: 09/06/2006	Last EDR Contact: 08/09/2006
Number of Days to Update: 28	Next Scheduled EDR Contact: 11/06/2006
	Data Release Frequency: Annually

## **MLTS:** Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 07/10/2006	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 07/20/2006	Telephone: 301-415-7169

Number of Days to Update: 48	Next Scheduled EDR Contact: 10/02/2006
	Data Release Frequency: Quarterly

## **MINES:** Mines Master Index File

Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

Date of Government Version: 05/16/2006	Source: Department of Labor, Mine Safety and Health Administration
Date Data Arrived at EDR: 06/28/2006	Telephone: 303-231-5959
Date Made Active in Reports: 08/23/2006	Last EDR Contact: 06/28/2006
Number of Days to Update: 56	Next Scheduled EDR Contact: 09/25/2006
	Data Release Frequency: Semi-Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **FINDS:** Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 07/21/2006	Source: EPA
Date Data Arrived at EDR: 07/25/2006	Telephone: N/A
Date Made Active in Reports: 09/06/2006	Last EDR Contact: 04/03/2006
Number of Days to Update: 43	Next Scheduled EDR Contact: 07/03/2006
	Data Release Frequency: Quarterly

## **RAATS:** RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 09/05/2006
Number of Days to Update: 35	Next Scheduled EDR Contact: 12/04/2006
	Data Release Frequency: No Update Planned

## **BRS:** Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2003	Source: EPA/NTIS
Date Data Arrived at EDR: 06/17/2005	Telephone: 800-424-9346
Date Made Active in Reports: 08/04/2005	Last EDR Contact: 07/21/2006
Number of Days to Update: 48	Next Scheduled EDR Contact: 09/11/2006
	Data Release Frequency: Biennially

## **STATE AND LOCAL RECORDS**

### **SHWS:** Promulgated Sites

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 05/02/2006	Source: Department of Health and Environment
Date Data Arrived at EDR: 05/10/2006	Telephone: 615-532-0900
Date Made Active in Reports: 06/12/2006	Last EDR Contact: 05/05/2006
Number of Days to Update: 33	Next Scheduled EDR Contact: 07/31/2006
	Data Release Frequency: Semi-Annually

### **SWF/LF:** Solid Waste Disposal Facilities

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 04/19/2006	Source: Department of Environment and Conservation
Date Data Arrived at EDR: 04/24/2006	Telephone: 615-532-0804

**VCP:** Voluntary Cleanup, Oversight and Assistance Program Sites

The Voluntary Cleanup Oversight and Assistance Program (VOAP) offers people the opportunity to work proactively with state government to address necessary cleanup of a property to return it to productive use. In return for their efforts, participants can receive a No Further Action letter and a release of liability for areas where investigation and cleanup is conducted. The program is open to everyone with an interest in addressing contamination at a site.

## EDR PROPRIETARY RECORDS

### **Manufactured Gas Plants:** EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### **CT MANIFEST:** Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2004

# GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM

## TARGET PROPERTY ADDRESS

CHATTANOOGA (VAAP) USARC  
6703 BONNY OAKS DRIVE  
CHATTANOOGA, TN 37363

## TARGET PROPERTY COORDINATES

Latitude (North):	35.07450 - 35° 4' 28.2"
Longitude (West):	85.1544 - 85° 9' 15.9"
Universal Tranverse Mercator:	Zone 16
UTM X (Meters):	668275.1
UTM Y (Meters):	3882664.8
Elevation:	758 ft. above sea level

## USGS TOPOGRAPHIC MAP

Target Property Map:	35085-A2 EAST CHATTANOOGA, TN
Most Recent Revision:	1976

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

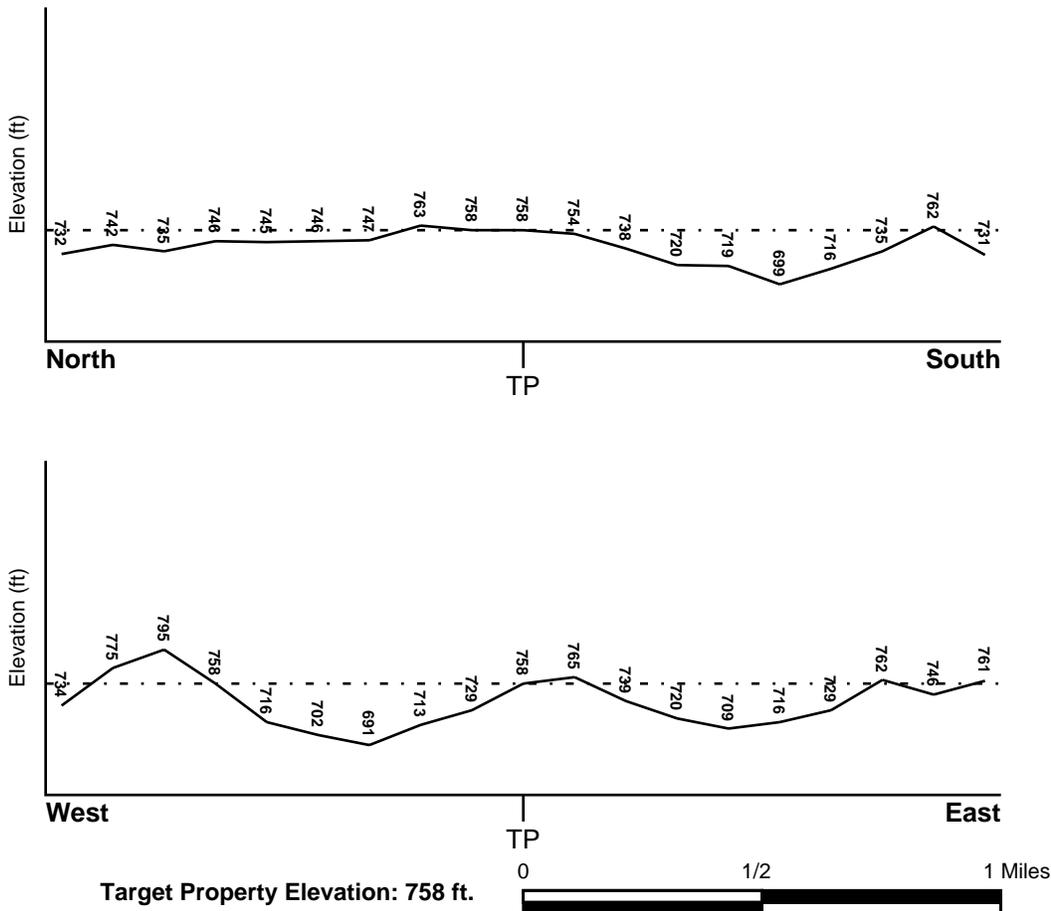

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Target Property County</u> HAMILTON, TN	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map

4700720018D

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u> EAST CHATTANOOGA	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	--

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u> <u>FROM TP</u>	<u>GENERAL DIRECTION</u> <u>GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### ROCK STRATIGRAPHIC UNIT

Era: Paleozoic  
System: Cambrian  
Series: Cambrian  
Code: C (*decoded above as Era, System & Series*)

#### GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: FULLERTON

Soil Surface Texture: cherty - silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	15 inches	cherty - silt loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel. COARSE-GRAINED SOILS, Gravels, Gravels with fines, Clayey Gravel.	Max: 2.00 Min: 0.60	Max: 5.50 Min: 4.50
2	15 inches	19 inches	cherty - silty clay loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 2.00 Min: 0.60	Max: 5.50 Min: 4.50
3	19 inches	90 inches	cherty - clay	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 2.00 Min: 0.60	Max: 5.50 Min: 4.50

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: cherty - loam  
silt loam

Surficial Soil Types: cherty - loam  
silt loam

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: cherty - silty clay loam  
very cherty - silty clay  
clay  
cherty - silt loam  
silty clay loam  
silt loam

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### **USGS 7.5' Digital Elevation Model (DEM)**

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### **Scanned Digital USGS 7.5' Topographic Map (DRG)**

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

### **State Wetlands Data: Wetlands Inventory**

Source: Tennessee Spatial Data Server

Telephone: 931-528-6481

## HYDROGEOLOGIC INFORMATION

### **AQUIFLOW<sup>R</sup> Information System**

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### **Geologic Age and Rock Stratigraphic Unit**

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### **STATSGO: State Soil Geographic Database**

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### **SSURGO: Soil Survey Geographic Database**

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### **PWS:** Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### **PWS ENF:** Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### **USGS Water Wells:** USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### **County Water Wells in Tennessee**

Source: Department of Environment and Conservation

Telephone: 615-532-0191

Water wells in the following counties - Shelby, Davidson, Knox, Williamson, Anderson, Hamilton. Includes Nashville, Memphis and Knoxville.

## OTHER STATE DATABASE INFORMATION

### RADON

#### **State Database: TN Radon**

Source: Department of Environment & Conservation

Telephone: 615-299-9725

Radon Test Results

#### **Area Radon Information**

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### **EPA Radon Zones**

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

#### **Airport Landing Facilities:** Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

#### **Epicenters:** World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

## EDR City Directory Abstract

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening report designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

***Thank you for your business.***

Please contact EDR at 1-800-352-0050  
with any questions or comments.
